Description: Siphon Box Z is a 35' tall x 14.67' wide x 14.67' wide concrete structure, with approximately 20' of the structure above ground elevation. Located east of the Trinity River, its purpose is to act as an air release for the 84" pipe which runs through the structure. This will help displace the air for the pipe so that when the flow goes under the Trinity River, sludge does not build up on the bottom of the pipe. |  |     |   |              |                    | <b>Issued :</b> 05/03/2016 |
