

JULY 2016

Code Report

Code Report

The monthly *Code Report* is an initiative of the City of Fort Worth's Code Compliance Department aimed at keeping the residents of Fort Worth abreast of the department's services to the community and the results of such efforts.

The Code Compliance Department has six main public service areas:

- Animal Care and Control
- Code Enforcement
- Consumer Health
- Customer Care
- Environmental Management
- Solid Waste Services

The July issue marks the half year publication of the *Code Report* and includes a brand new section: "Staff Spotlight". This new section will appear intermittently in future issues of the *Code Report*, whenever appropriate. Please take the time to read the *Code Report* and share your thoughts with us. We value your insights and feedback on Code Compliance's various programs and look forward to hearing from you.

Please notice that, unless noted, the *Code Report* makes use of fiscal year (FY) instead of calendar year. Fort Worth's fiscal year runs from October 1 of a given year to September 30 of the following year.

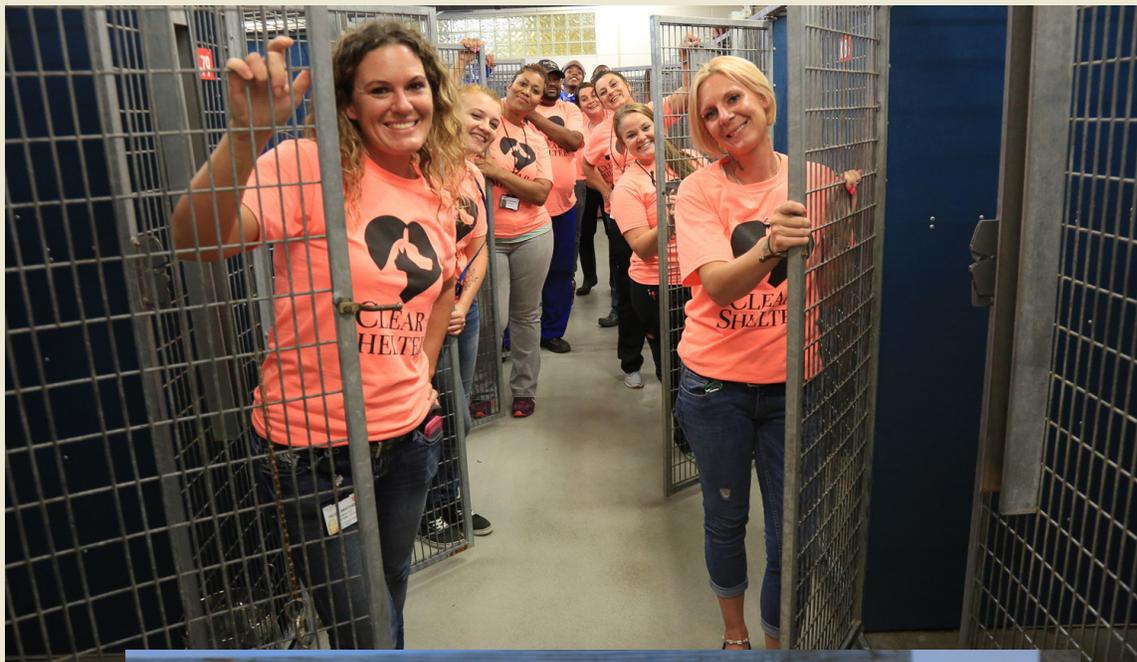

For comments, suggestions or questions please contact:

Animal Care and Control

Animal Care and Control directs animal shelter operations, animal adoption centers, spay/neuter and low-cost vaccinations clinics, animal ordinance enforcement and public education. These programs work to reduce the number of unwanted stray animals in the city, minimize the threat of diseases such as rabies, and prevent injuries caused by animals. It's the goal of the shelter to find loving and forever homes for all the animals that land in their care.

July 2016 Statistics

This chart reflects the movement of animals in and out of the shelter during July 2016. Most significant is the shelter's "live release rate" which indicates how many pets successfully left the shelter either through adoption, rescue or return to owner. The daily challenge of managing a municipal shelter is daunting as the Fort Worth Animal Shelter refuses no animals. The vast majority of the animals that come into the shelter are a result of unwanted animals helplessly wandering the streets.

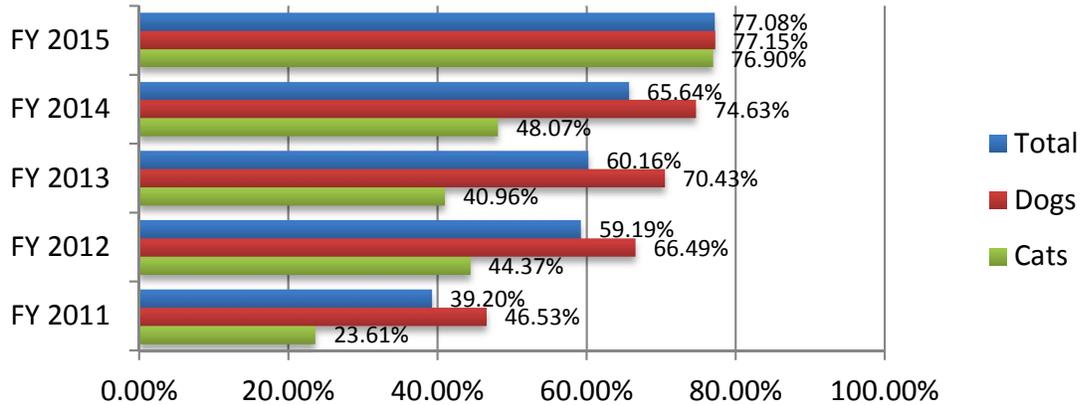

July Live Release Rate: 85.91%

	Dogs	Cats	Total
A BEGINNING SHELTER COUNT 7/1/2016	430	312	742

Live Release Rate

The “live release rate” indicates how many pets successfully left the shelter either through adoption, rescue or return to owner. The July rate of 85.91 percent is another accomplishment for the shelter and its partners. These statistics are nearly unobtainable by a majority of government-supported shelters due to lack of resources and funding.

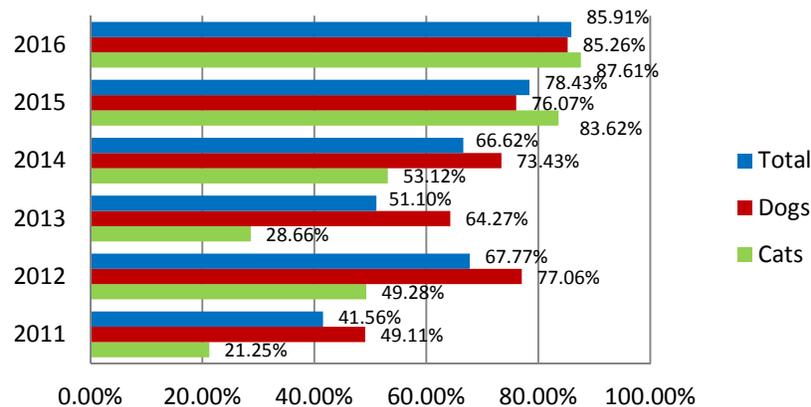

ANNUAL LIVE RELEASE RATE COMPARISON

FISCAL YEAR TO DATE LIVE RELEASE RATE COMPARISON

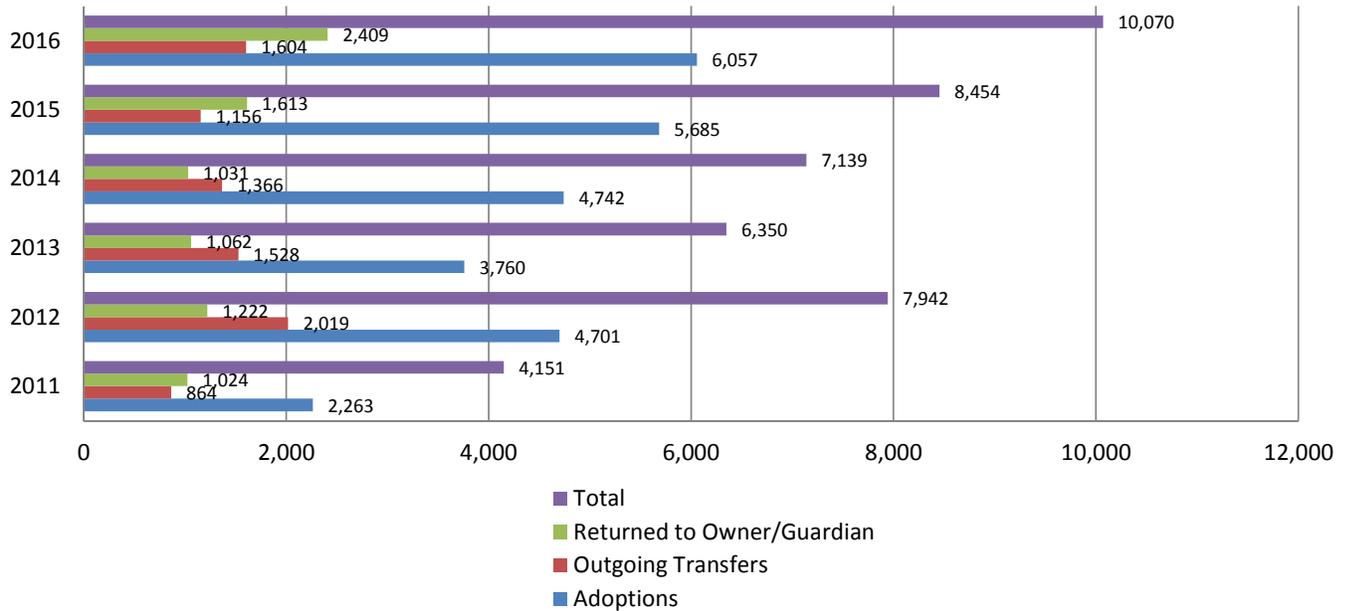

JULY LIVE RELEASE RATE BY YEAR

Outcomes

FISCAL YEAR TO DATE LIVE OUTCOMES COMPARISON

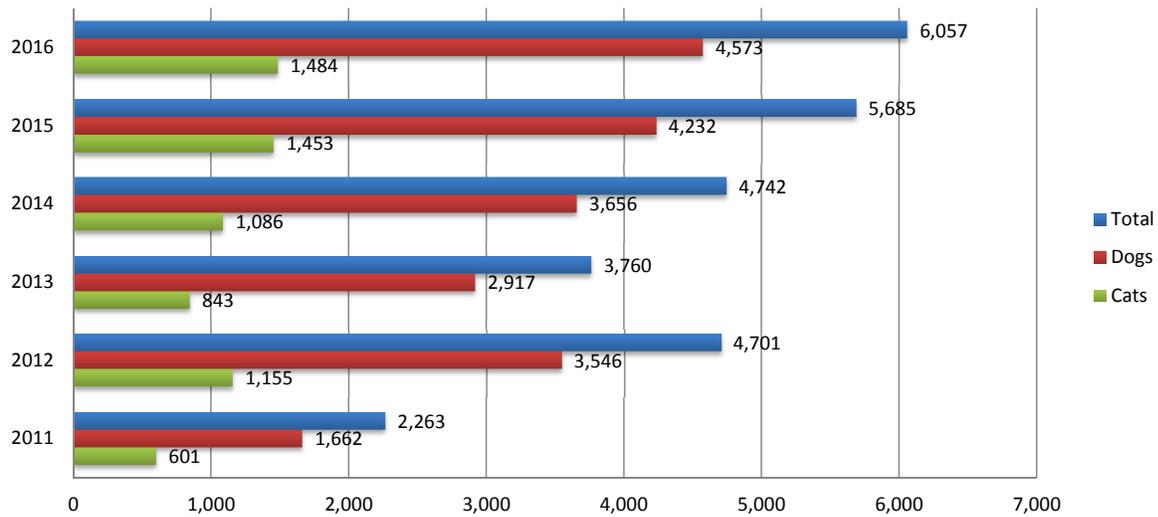

STRONG PARTNERSHIPS
with the community result in increased live outcomes.

ANIMAL CARE AND CONTROL

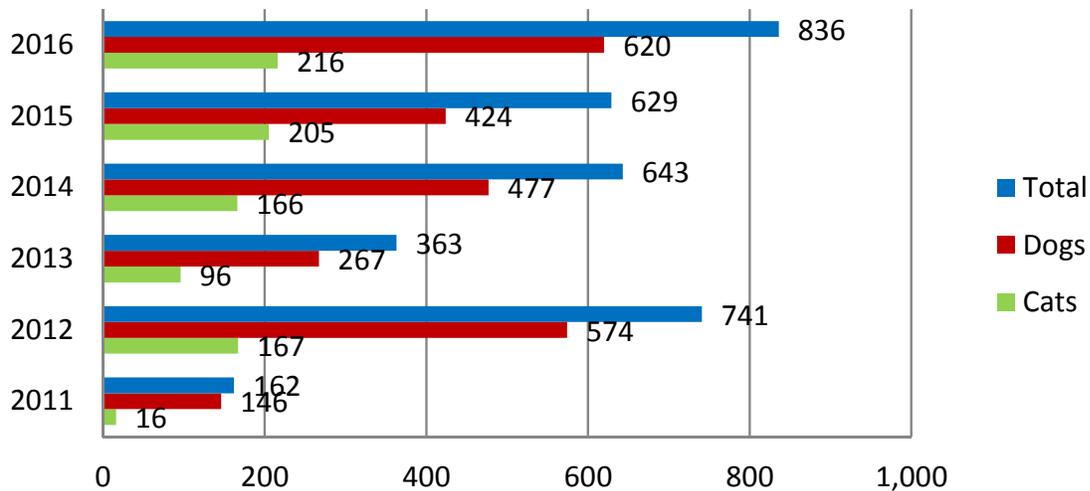

ANNUAL ADOPTIONS

FISCAL YEAR TO DATE ADOPTIONS

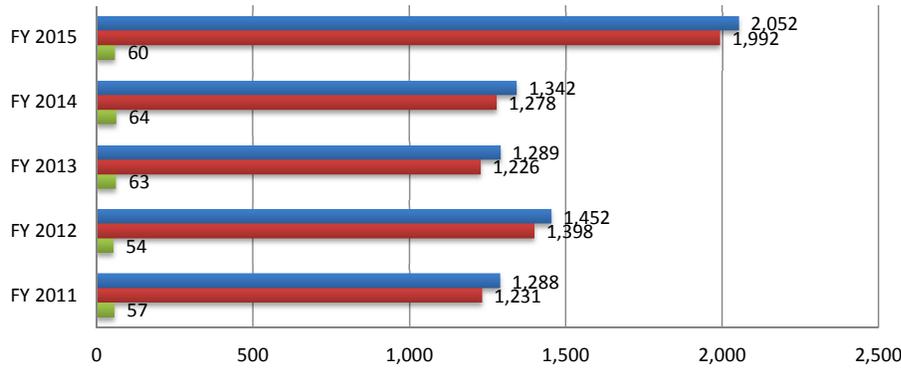

JULY ADOPTIONS

Return to Owner

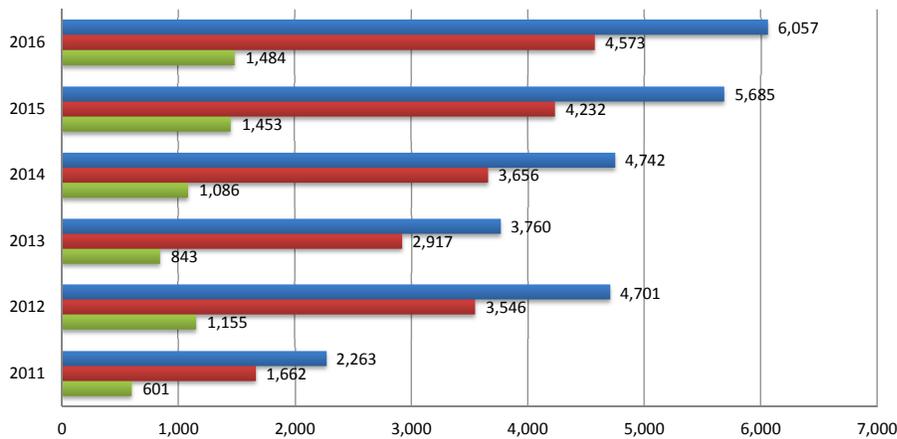

A huge effort is made by animal control officers working within the neighborhoods to return stray/lost pets to their owners without impounding the pets at the shelter. Pets who wear a collar with the city license tag or pets who are micro-chipped have a high rate of being returned to their owners.

ANNUAL RETURNED TO OWNER

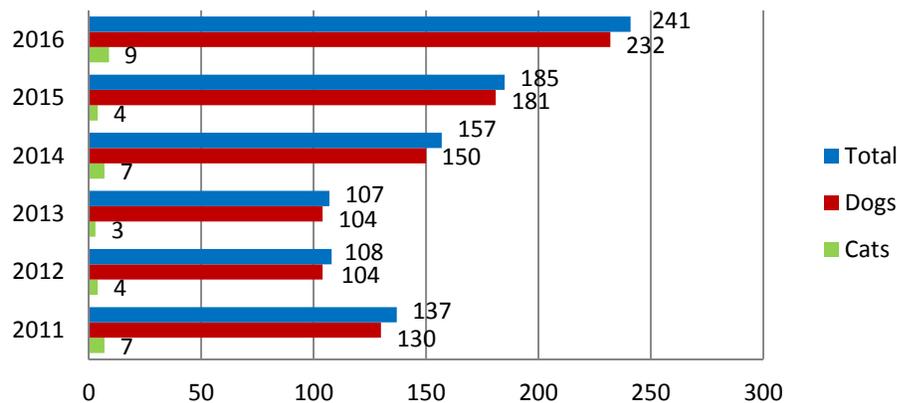

Note: Animal Control Officers do not actively seek out and capture stray cats. Those that are captured are returned to their places of origin under the Trap, Neuter, Vaccinate & Return program

FISCAL YEAR TO DATE RETURNED TO OWNER

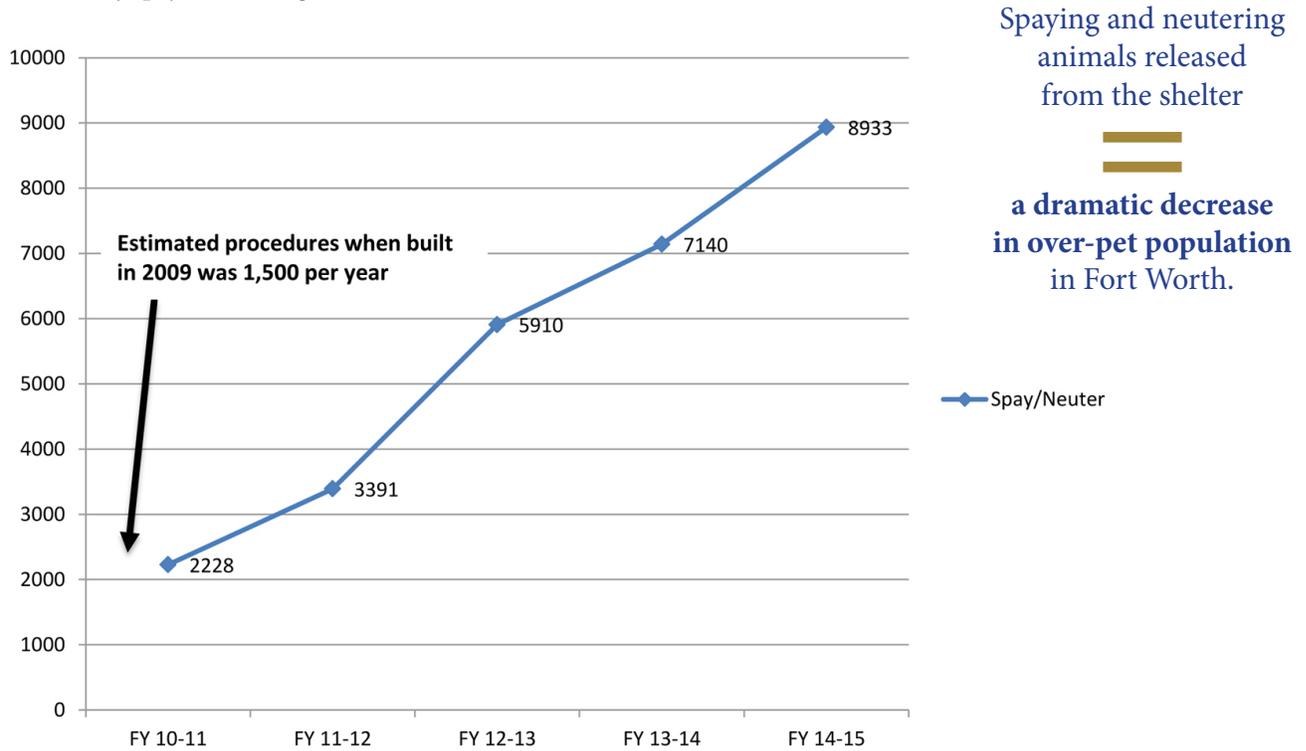

JULY RETURN TO OWNER

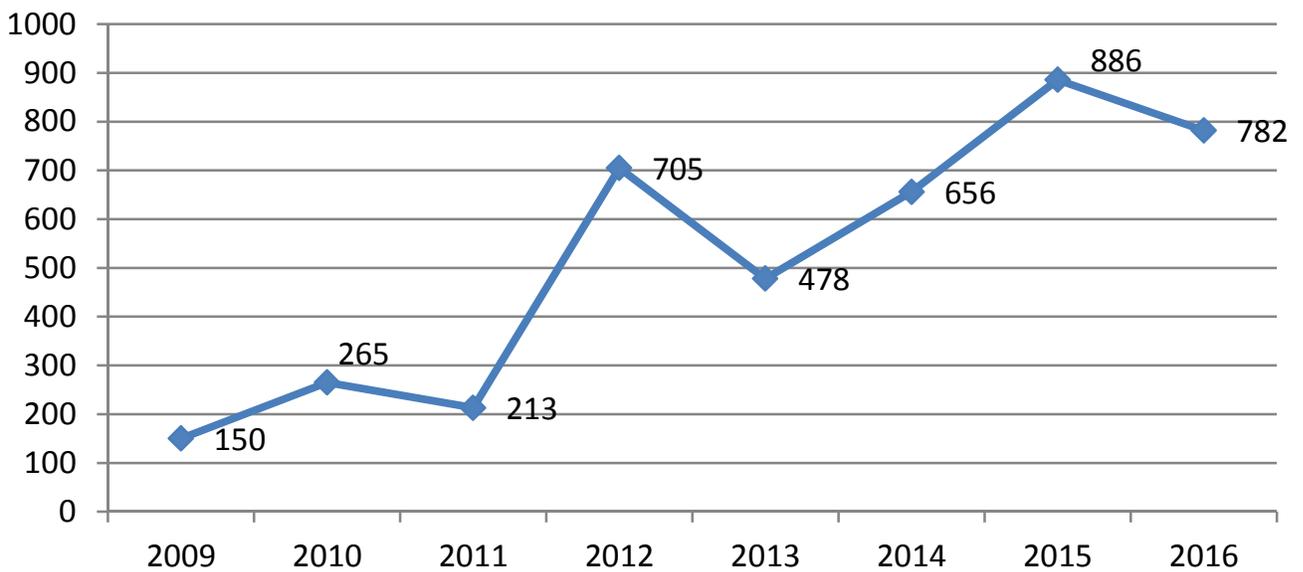

ANIMAL CARE AND CONTROL

ANNUAL SPAY AND NEUTER SURGERIES

In order to reduce the stray pet population and to protect the public from safety issues that can occur because of stray animals, all pets that land in the Fort Worth Animal Shelter are spayed and/or neutered before they are adopted, rescued or returned to owners. This chart provides an overview of the dramatic intake of animals coming into the shelter and the mandatory spay/neuter surgeries.

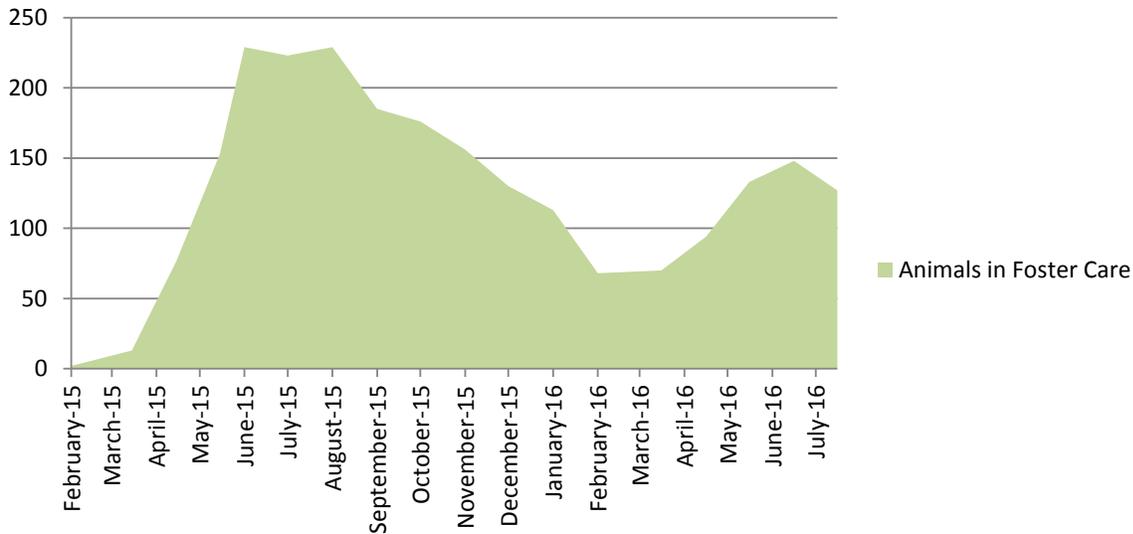

JULY YEAR-TO-YEAR COMPARISON

New Foster Program - Cowtown Crashpads

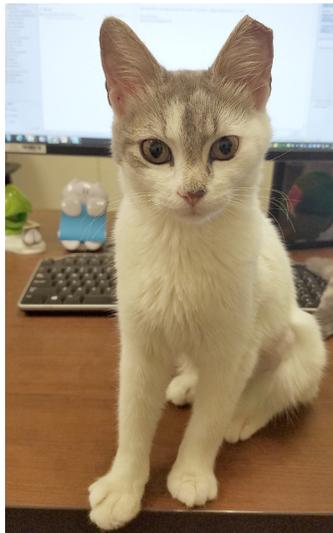

In 2015, the Fort Worth Animal Shelter created its first foster care program entitled Cowtown Crashpads. This program has been a huge success in allowing pets to have the time they need to become adoptable. Pets that enter into the foster program may be recovering from illnesses, injuries or may include newborns too young to be adopted.

ANIMALS IN FOSTER CARE

Note: Chart reflects calendar year data

The rise beginning in May and subsequent decrease after August is indicative of more animals in foster care during dog and cat breeding season which follows warmer weather.

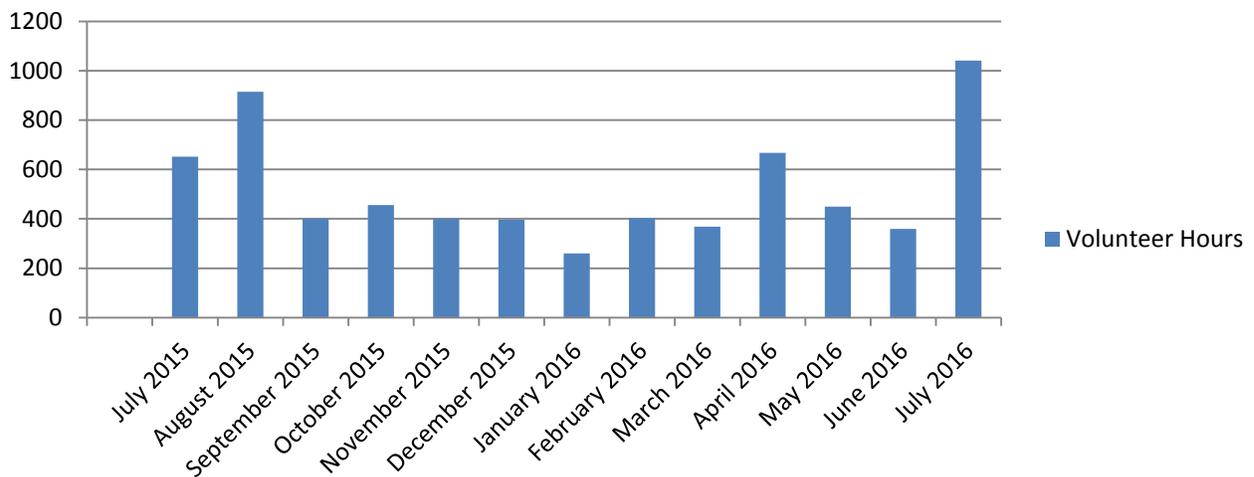

Volunteer Program

A new volunteer program was established in 2014 to provide much-needed assistance at the animal shelter as well as its two PetSmart Adoption Centers. The program has steadily grown to include volunteers who regularly play and socialize with the pets, assist with special adoption events such as Clear The Shelters, Shelter Pets Rock and offer support to staff.

VOLUNTEER HOURS

Note: Chart reflects calendar year data

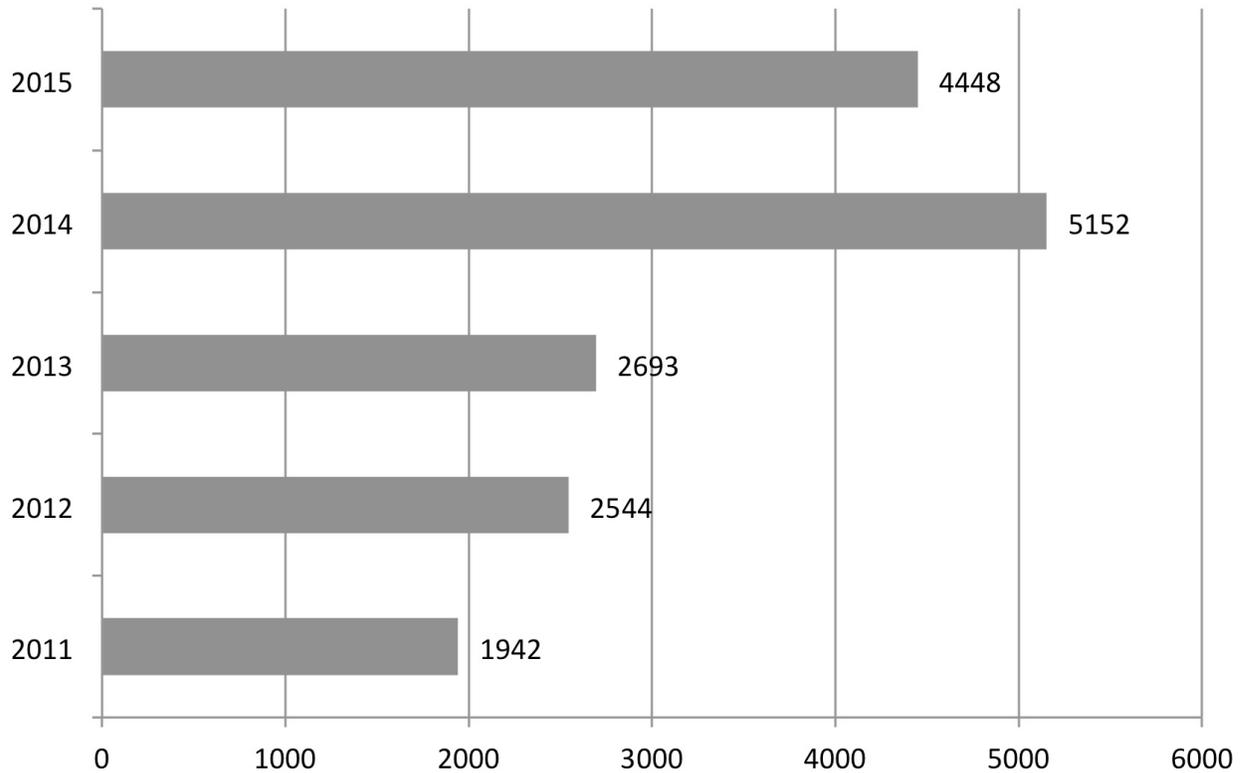

Volunteers spend on average an impressive
300 hours
 monthly working with our shelter pets – socializing, mobile adoption events, grooming, and even cleaning up!

Enforcement and General Citations

The Fort Worth Animal Shelter provides enforcement of a number of state laws and city ordinances to protect the community at large.

ANNUAL CITATIONS ISSUED

The number of citations issued depends on the number of stray animals reported in the City of Fort Worth. In 2015 a new program of returning dogs to their owners in the field began. This program combined with an additional stray animal team implemented in 2014 resulted in a decrease in the number of citations written in 2015.

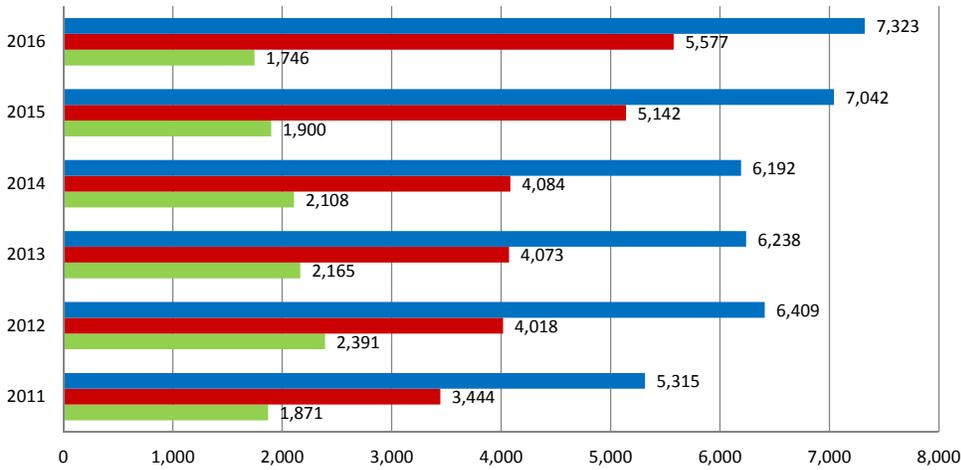

Note: Chart reflects calendar year data

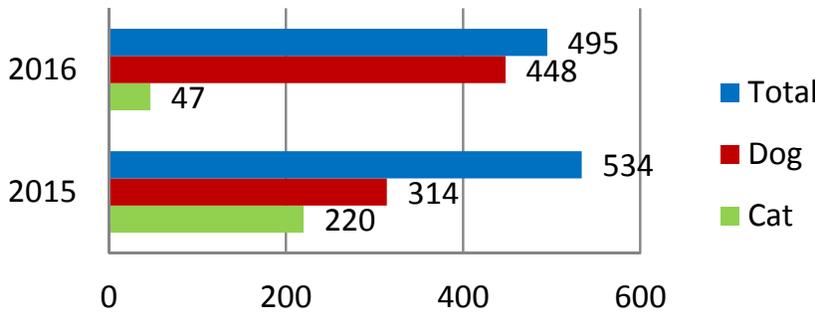

Stray Animal Capture

In 2014, Fort Worth Animal Care & Control furthered their efforts with a new focus of removing stray animals from the streets in our community. The stray teams were formed with a single focus to capture stray animals in the field. There are currently two teams of three officers on each team. Their efforts, in conjunction with other animal officers, have also included record-setting numbers of dogs returned to their owners in the field.

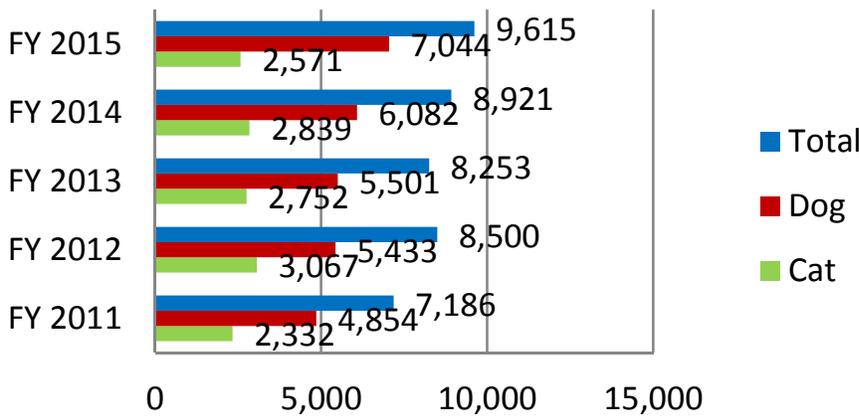

FISCAL YEAR TO DATE STRAY ANIMAL CAPTURE

JULY STRAY ANIMAL CAPTURE

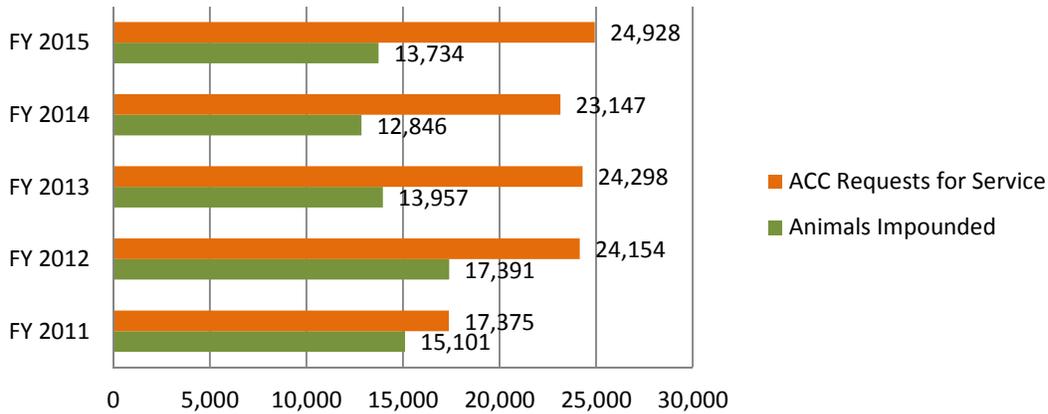

YEAR TO YEAR STRAY ANIMAL CAPTURE

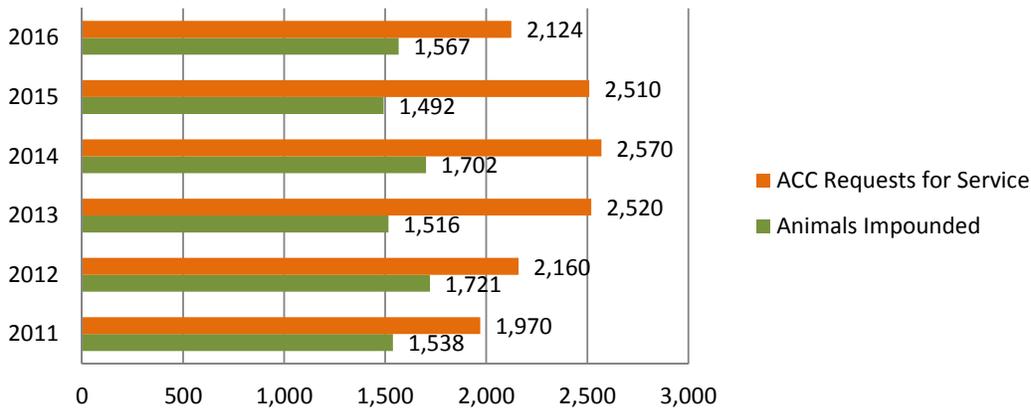

ANIMAL CARE AND CONTROL

REQUEST FOR SERVICE

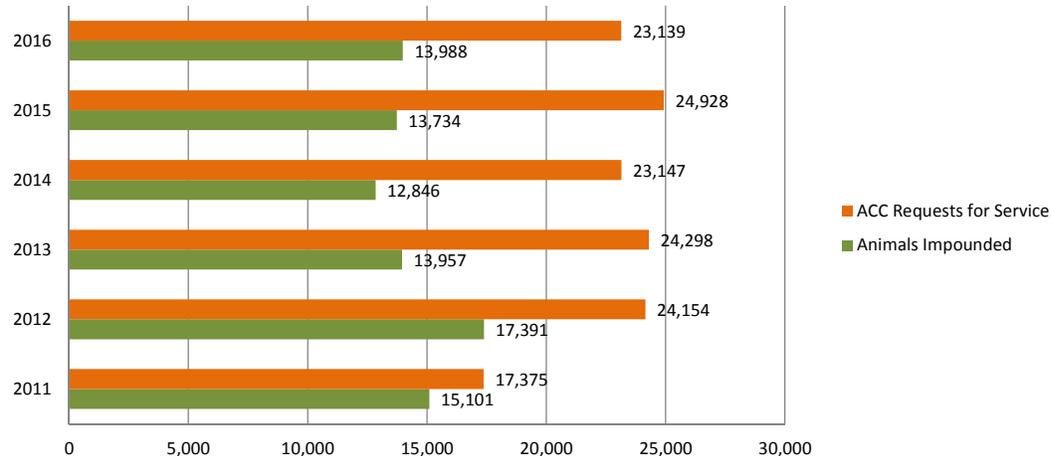

In 2014-2015, Fort Worth Animal Care & Control received nearly 25,000 calls for service regarding animal issues. Requests for service typically include all animal welfare issues from stray or injured animals; animals in danger, to wildlife and livestock.

Code Enforcement

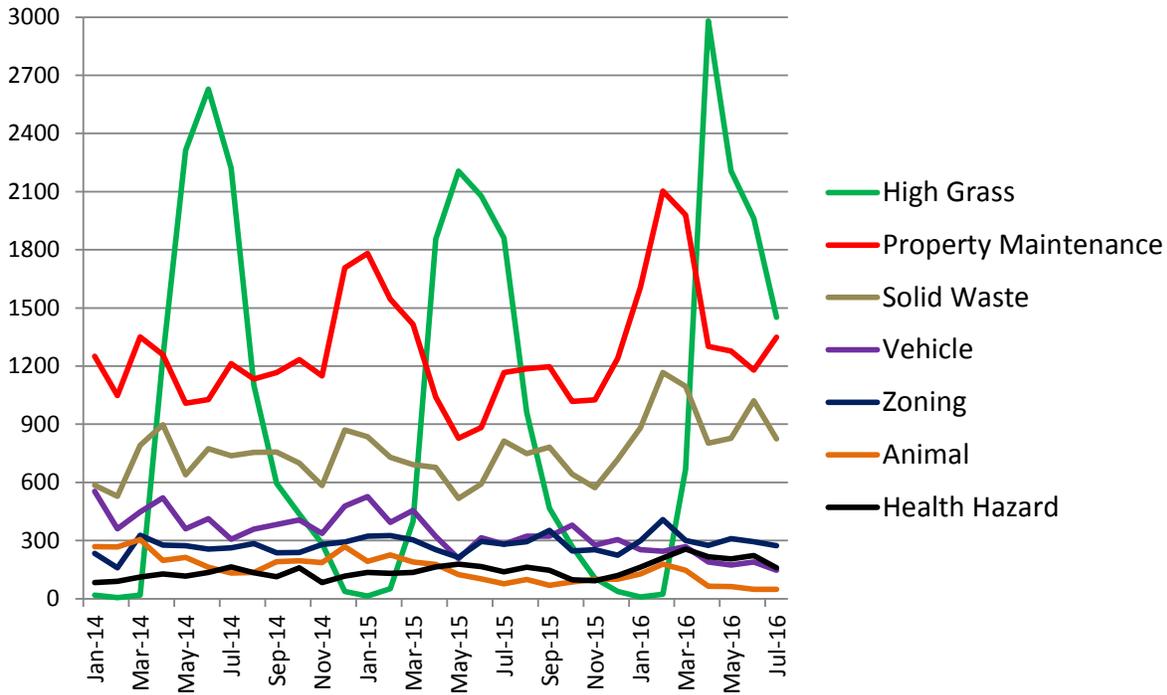

Code Enforcement has two divisions: the Neighborhood Investigations Division and the Building Standards Division which both maintain Fort Worth's status as a clean, livable city by ensuring property complies with rules set by City Council. Code Officers routinely patrol assigned neighborhoods for code violations and investigate complaints with a mission of abating issues and educating residents.

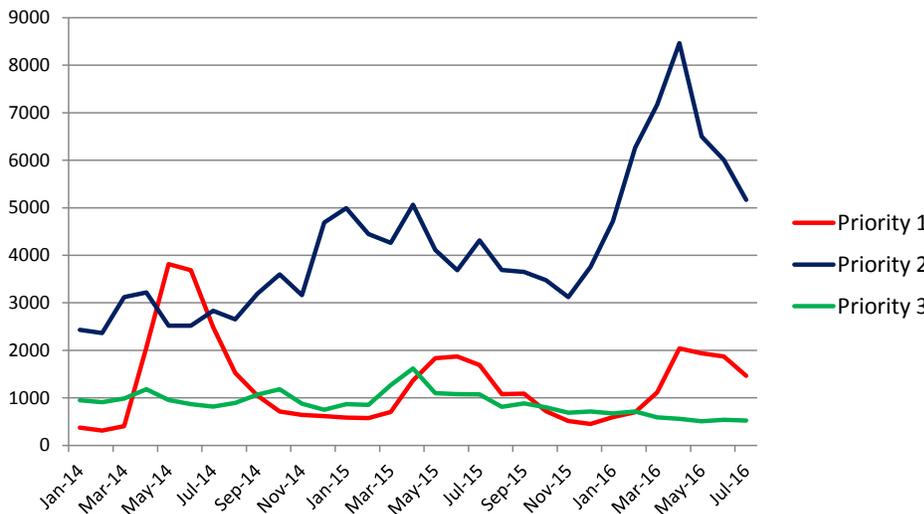

Neighborhood Investigations Division

Neighborhood Investigations Division consists of the neighborhood Code Officers who investigate violations such as high grass, open and vacant structures, junk vehicles, accumulation of debris, contaminated bulk waste and zoning issues.

VIOLATIONS WORKED

VIOLATIONS BY PRIORITY

Neighborhood Code Officers work violations based on priority.

Priority 1 violations are the most dangerous, such as sewage leaks, stagnant water, open/vacant structures and grass over 24 inches in height.

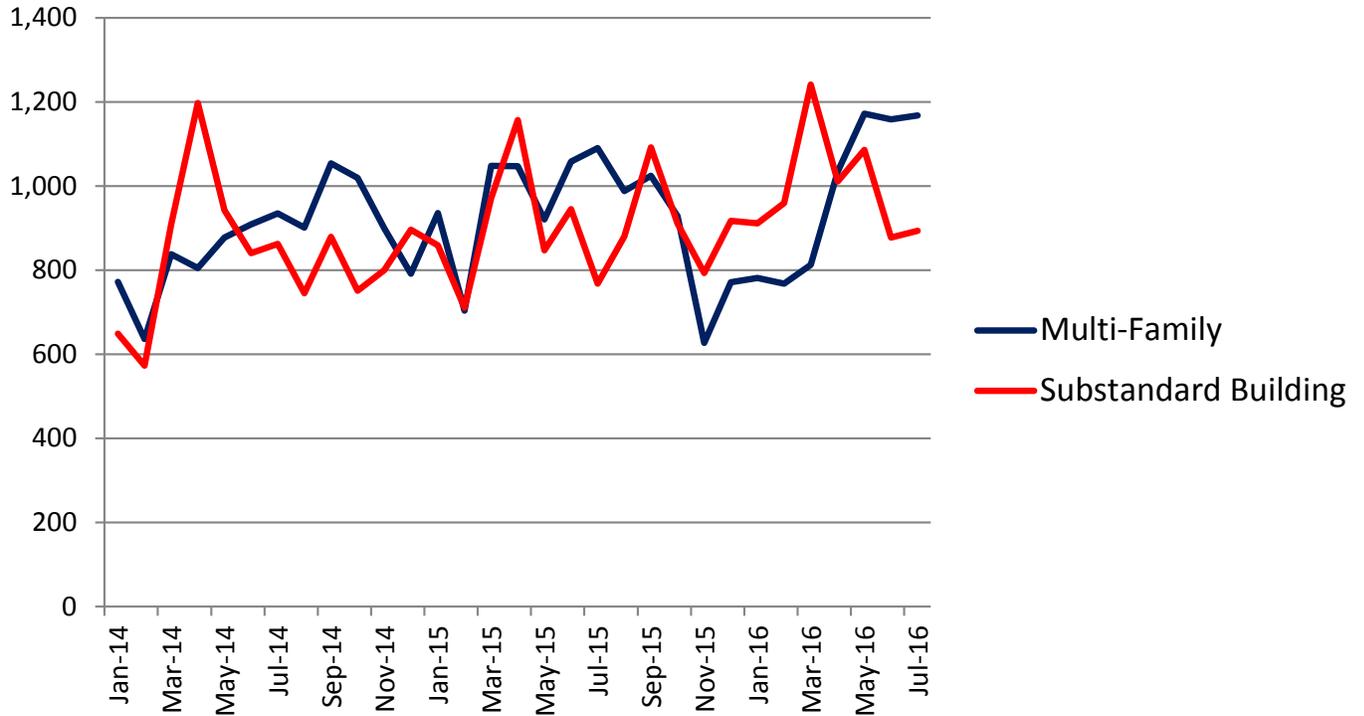

Priority 2 violations include accumulation of debris, bulk waste violations, junk vehicles, outside storage, animal violations and grass between 18 and 24 inches in height.

Priority 3 violations include garbage/recycling cart violations, garage sales and grass between 12 and 18 inches in height.

Building Standards Division

The Building Standards Division consists of the Substandard Buildings Section and the Multi-Family Registration & Inspection Program. The substandard building Code Officers inspect residential and commercial structures while the multi-family Code Officers focus on apartment complexes and properties with three or more units.

VIOLATIONS WORKED

A substandard structure is any building that does not meet the standards or specifications established in the building, plumbing, electrical and mechanical codes

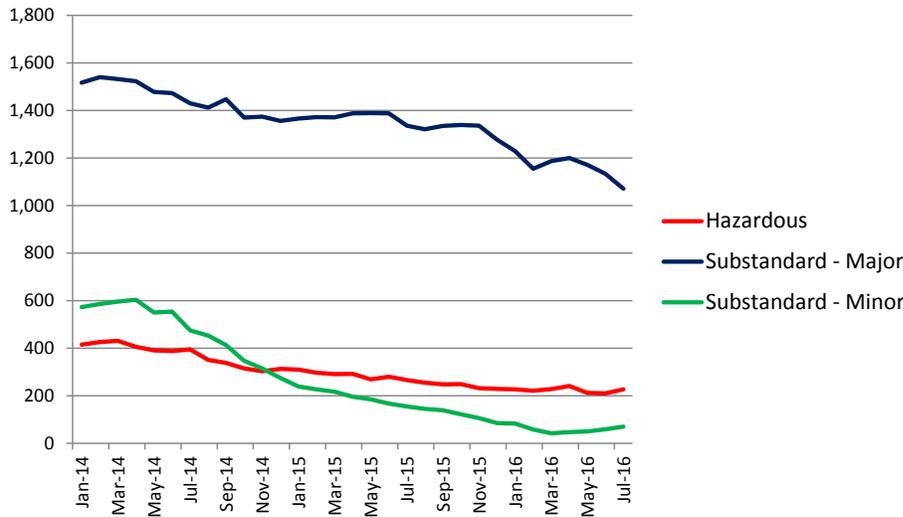

may endanger the life, health and safety of the public.

Substandard Structures

A substandard structure is any building that does not meet the standards or specifications established in the building, plumbing, electrical and mechanical codes and endangers the life, health and safety of the public

SUBSTANDARD STRUCTURE CASES BY CATEGORY

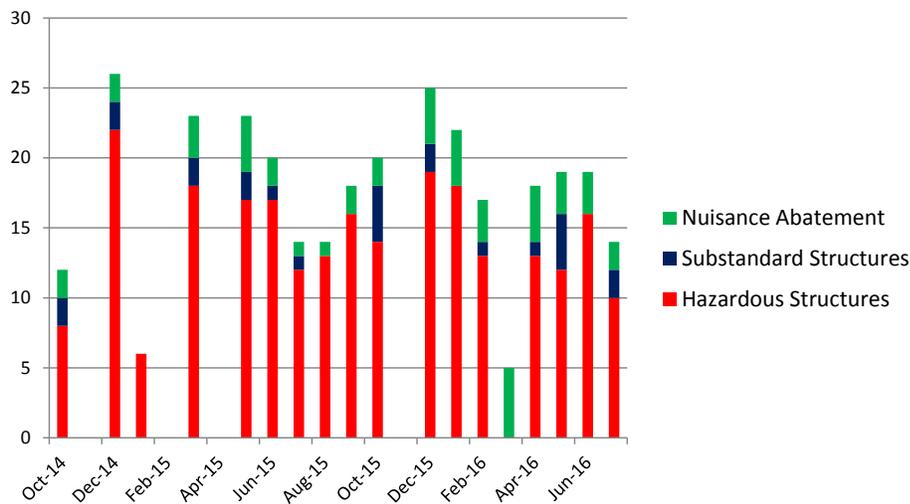

Structures are prioritized based on three categories. Hazardous structures are the most dangerous and need to be repaired or demolished as soon as possible.

BUILDING STANDARDS COMMISSION ORDERS BY CATEGORY

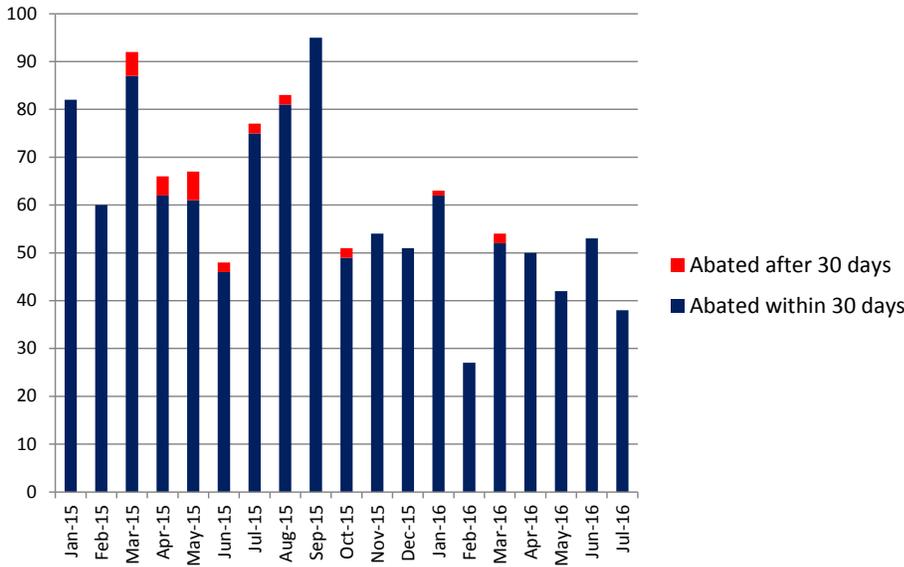

When property owners fail to repair or demolish substandard structures, the property may be taken before the Building Standards Commission. This Commission has the authority to order an owner to comply with all applicable laws and ordinances, including repair or demolition of a structure. They also have the authority to order a property owner to remove or abate a nuisance, such as large accumulations of debris.

The Commission does not meet in November or during inclement weather.

OPEN AND VACANT STRUCTURE VIOLATIONS

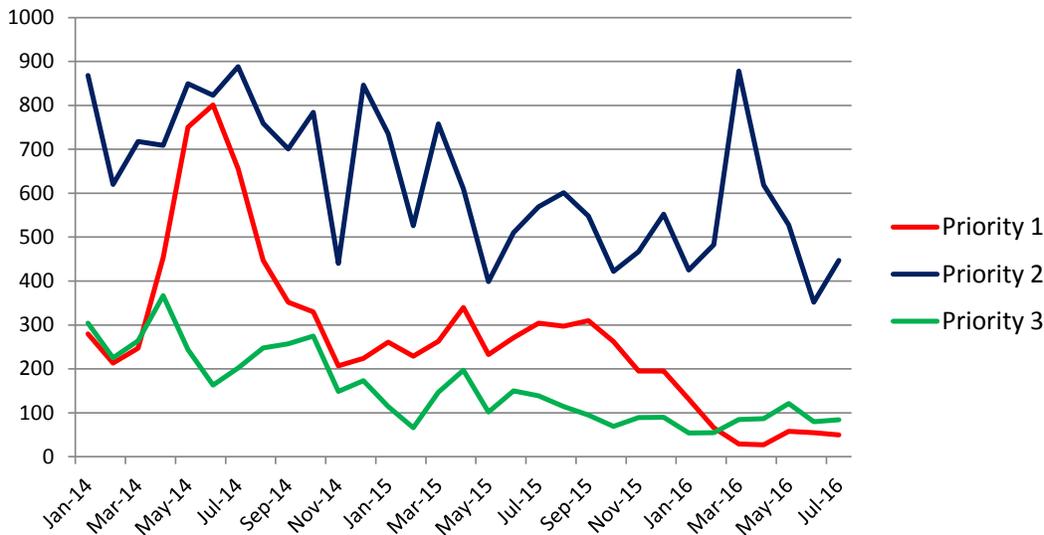

When abandoned structures remain open and unsecured, they provide opportunities for illegal activities such as prostitution and drug sales. Sometimes vagrants gain access and burn structures down while trying to stay warm in winter months. Abandoned structures also can deteriorate, becoming eyesores and promoting urban blight.

Code Enforcement Safe Neighborhood Initiatives

A Safe Neighborhood Initiative is a concentrated educational effort to remove blight and improve a neighborhood by encouraging cooperation and increasing neighborhood pride. Code Officers go door-to-door educating residents about code violations. Residents are given an opportunity to abate any existing violations identified during the discussion. If not abated within a given timeframe, property owners and residents are then issued notices of violation. If necessary, enforcement action is taken.

VIOLATIONS BY PRIORITY

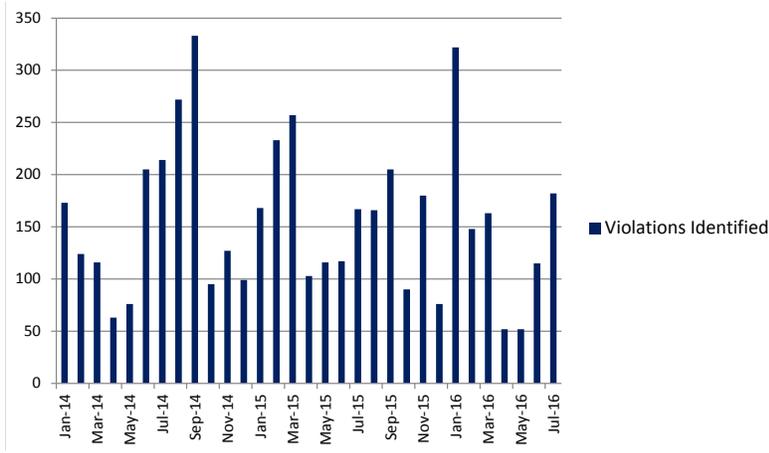

Fort Worth Code Rangers

The Fort Worth Code Rangers is a voluntary program that seeks to promote healthy neighborhoods through community empowerment and action by establishing and maintaining a strong relationship between citizen organizations and the Code Compliance Department.

Trained Code Ranger participants provide reports of suspected code violations. The city then sends courtesy letters to property owners and residents regarding possible code violations in an effort to improve the appearance and safety of the neighborhood. The goals of the program are to:

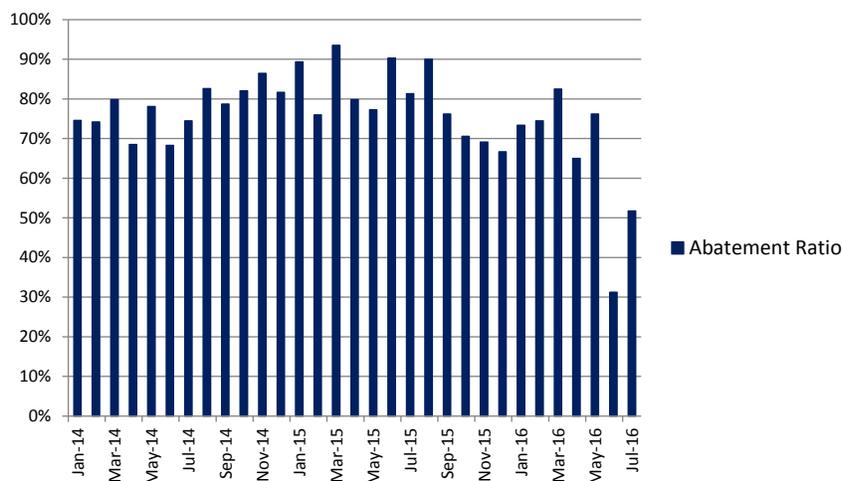

- Encourage residents and property owners to maintain their homes and yards in order to preserve property values and discourage crime.
- Allow Code Officers the opportunity to devote more time to chronic, dangerous or complicated issues affecting the neighborhood.
- Create a greater sense of community in each neighborhood by encouraging cooperation and increasing neighborhood pride.
- Make Fort Worth a cleaner, safer and more attractive place for all residents.

Consumer Health

Consumer Health staff provides health inspections, complaint investigations and education. Major tasks include enforcing the City's community health ordinances at permitted facilities and ensuring public safety by coordinating mosquito surveillance & prevention activities, as well as enforcing the game room ordinance.

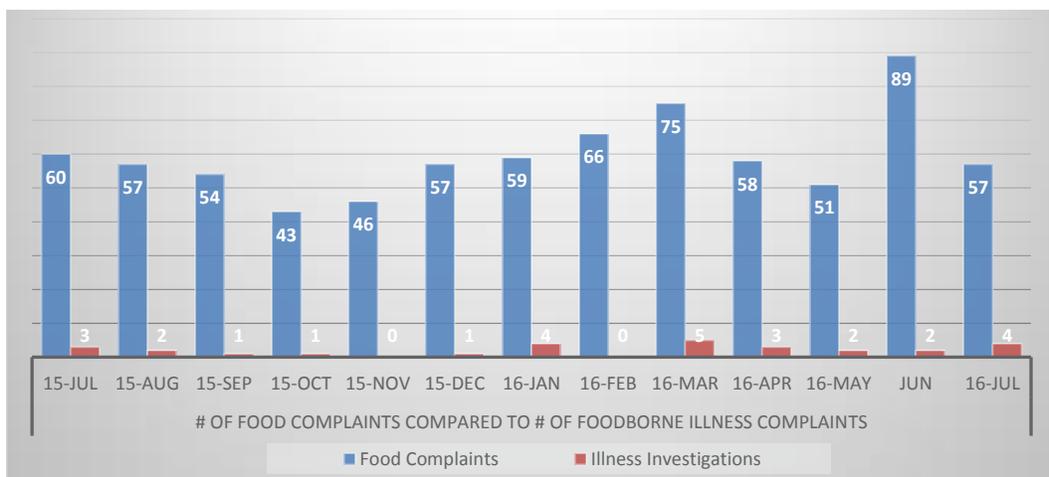

FOOD ESTABLISHMENTS WITH PASSING SCORES 2015 - 2016

The Consumer Health Division conducts more than 6,000 inspections annually in food establishments. This includes restaurants, child care kitchens and grocery stores. It also includes the corner stores, bars and gourmet food trucks that have become popular in Fort Worth. Our employees work with business owners to ensure food safety. Businesses that compromise food safety are given demerits during the inspection. This chart shows the percent of businesses that earn less than 30 demerits and “pass” their health inspection. Businesses that earn more demerits are subject to being closed and not allowed to reopen until they can serve food safely to our citizens.

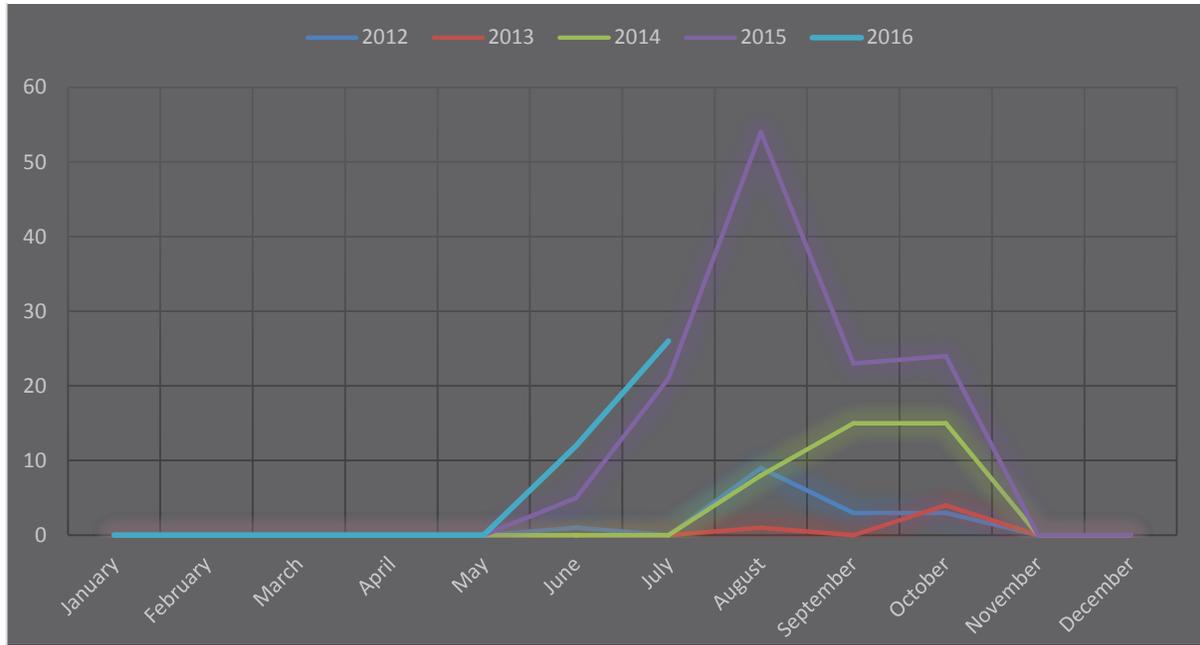

FOOD COMPLAINTS COMPARED TO FOOD BORNE ILLNESS COMPLAINTS

Preventing food borne illness or food poisoning is a top priority in Consumer Health. We investigate each report of food borne illness received from Tarrant County Public Health within 24 hours, most investigations are conducted within the same calendar day. The immediate response is necessary to stop the possible spread of illness. Consumer Health intervenes to address citizen complaints when they have concerns about a food establishment’s operations that could lead to a food borne illness. These complaints are more common, as indicated in the chart, and are addressed based on the risk of illness that is associated with the complaint. Consumer Health maintains a record of investigating 95% of these complaints within 72 hours.

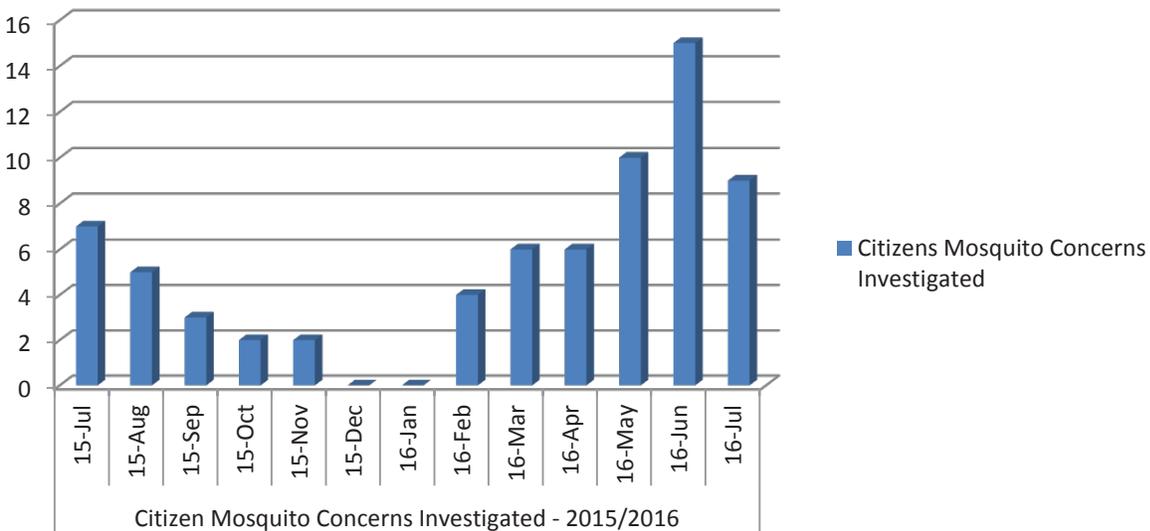

WEST NILE VIRUS ACTIVITY IN MOSQUITOES 2012 - 2015

Mosquito diseases are spread to humans through their bite. The Consumer Health Division collects samples of mosquitoes from May to October to test them for West Nile Virus. We use this data to target our prevention and education efforts to prevent the spread of those diseases to citizens that are at the highest risk locations. After 2012, when the West Nile Virus illness became a risk in the North Texa area, we have partnered with the University of North Texas Health Science Center to have a cost effective surveillance program that is based on measuring the risk of illness and preventing it. Our targeted education and mosquito spraying program is initiated based on our findings each week during the “mosquito season”. The chart below shows mosquitoes that tested positive for the West Nile Virus each month.

REPORTED CITIZEN CONCERNS = MOSQUITO INVESTIGATIONS

Citizen concerns regarding mosquitoes are typically investigated within 24 hours. Consumer Health staff treat any stagnant water that they find to prevent mosquito growth and educate the residents regarding mosquito prevention.

Customer Care

The Customer Care Division of Code Compliance has a single goal – offer excellence in customer service to the residents of Fort Worth. Residents calling the call center want convenience, quality and a quick resolution to their issues. Whether the issue is a simple question about hours of operation for the animal shelter or to report an illegal dump site in a neighborhood, the call center is at the core of resolving issues and providing information.

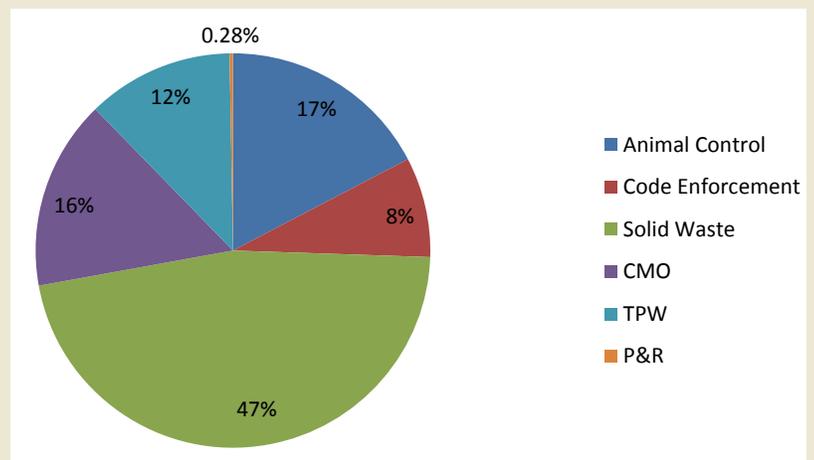

The Customer Care Division of Code Compliance encompasses the City’s Call Center, the Code IT Section, Code Safety and Code’s Customer Solutions Analyst.

The City’s Call Center answers inbound calls and initiates work orders for the following City of Fort Worth Department’s Divisions:

- Code Compliance Department
 - Animal Care and Control
 - Code Enforcement
 - Environmental Management
 - Solid Waste
- City Manager’s Office (CMO)
 - Switchboard
- Transportation and Public Works Department (TPW)
 - Construction Services
 - Parking Meters
 - Stormwater
 - Street
 - Traffic
- Park and Recreation Department (PARD)
 - Forestry

INBOUND PHONE CALLS

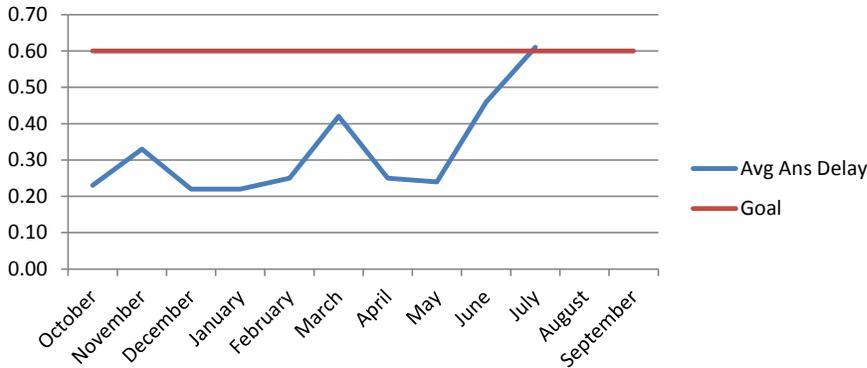

This chart illustrates the number of calls received by the call center for each division within Code Compliance as well as the other three departments Customer Care serves.

CUSTOMER CARE

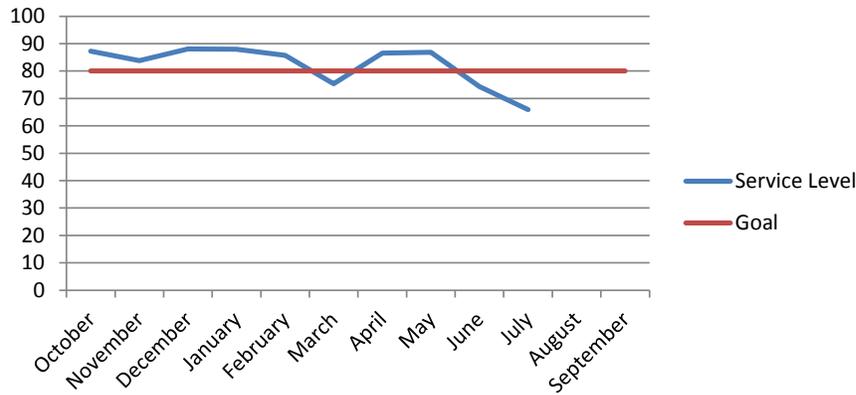

AVERAGE ANSWER DELAY

The City Call Center has received 255,556 calls this far in FY 2016. The “average answer delay” represents the average time in seconds that it took for received calls to be answered. It’s the goal of the call center to answer all calls within 60 seconds.

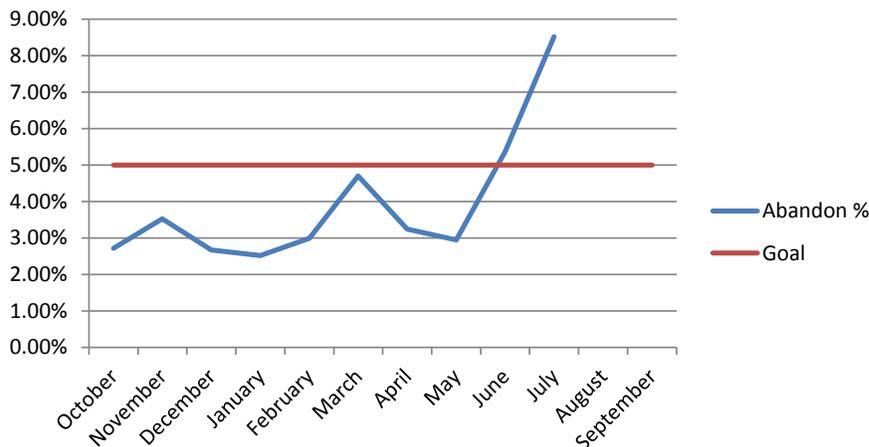

CALL CENTER’S SERVICE LEVEL

The call center’s service level goal is to answer at least 80% of all calls within 60 seconds. In March and June our call volume exceeded our resources due to an increase in Solid Waste service requests. In July due to a learning curve of our new phone system and recording tool combined with limited resources, we missed goal in some of our metrics.

CALL CENTER ABANDONMENT PERCENTAGE

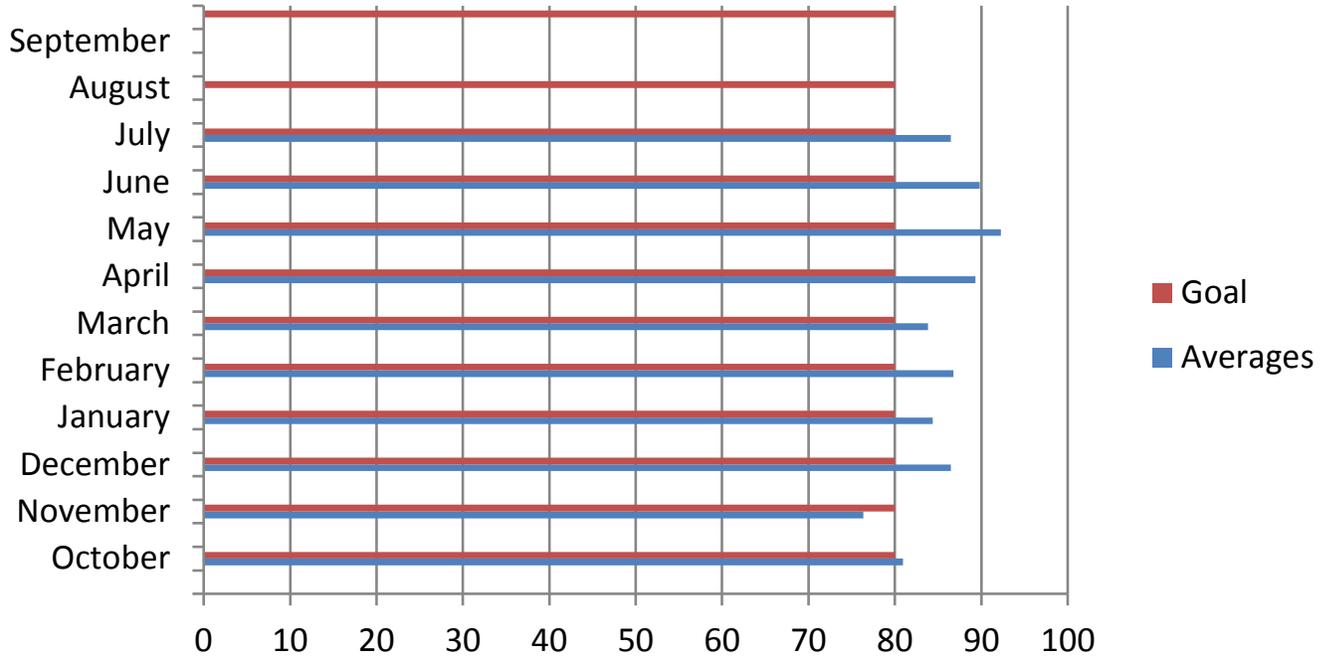

Call centers across the industry strive to maintain a 10% abandonment rate. The goal for the call center is five percent.

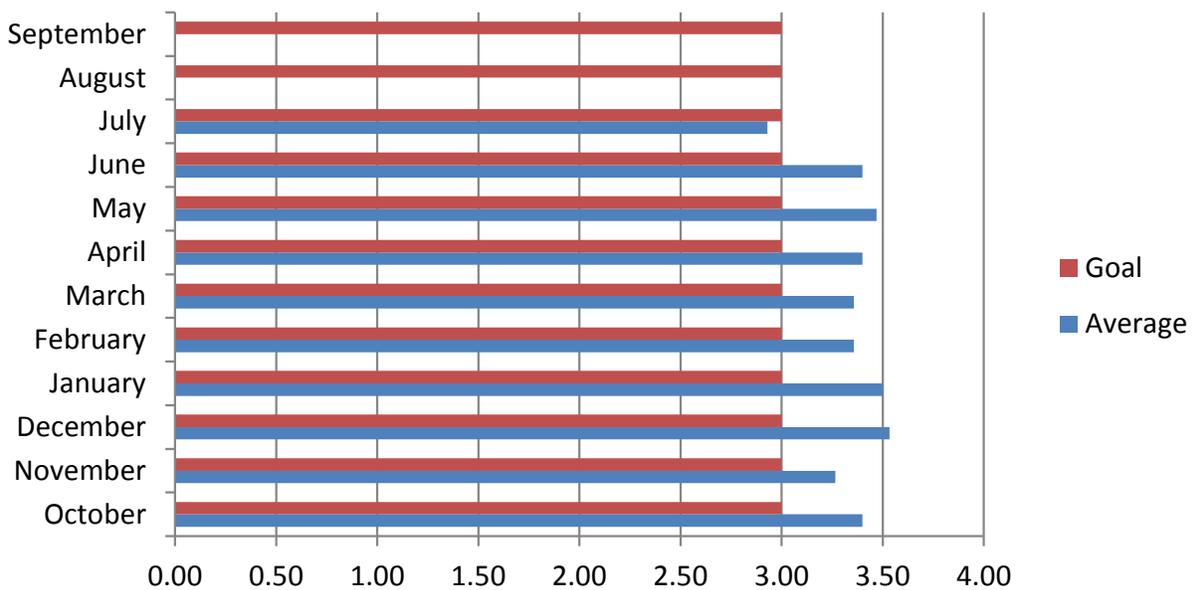

CUSTOMER CARE

CALL CENTER QUALITY AVERAGES

The call center contracts with a third-party vendor to monitor two calls, per representative, each month on a 100 point scale. Our goal is to average a minimum 80 points per month.

Supervisors monitor five calls per representative each month on a four-point scale. Our goal is to average at least three points per month.

Environmental Management

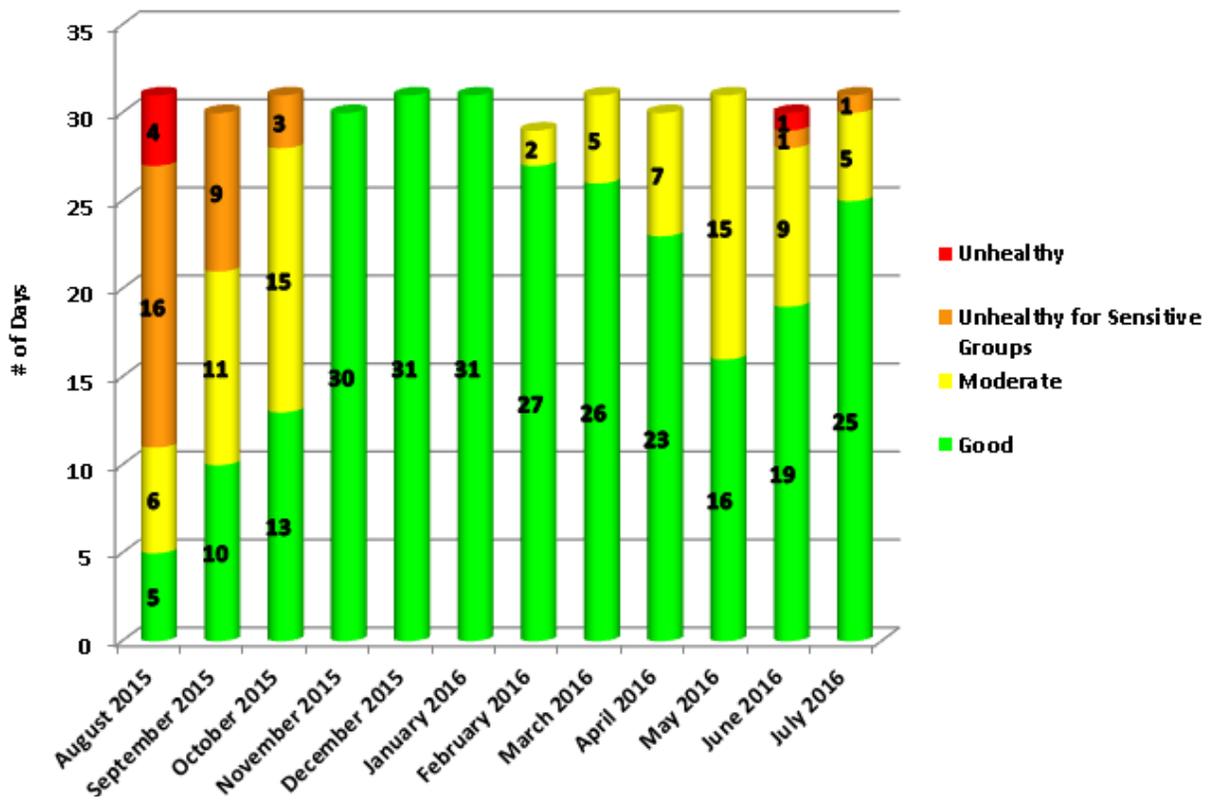

The Environmental Management Division ensures compliance with federal, state, and local environmental regulations to promote a clean and healthy environment. Staff monitors ambient air and local water quality, investigates concerns of environmental contamination, ensures environmental permit compliance, and provides safe household and city-generated hazardous waste disposal. Staff is also engaged in the brownfields program to encourage revitalization of economically distressed areas. These programs support economic development in Fort Worth through the integration of environmental assessment, remediation, and education. Additionally, staff will provide management strategies and policy oversight for litter management in the coming months.

AIR QUALITY INDEX

The Air Quality Index (AQI) is used to report daily air quality. It tells how clean or polluted the air is, and what associated health effects might be a concern for people. The AQI focuses on health effects a person may experience within a few hours or days after breathing polluted air. Although there are five major pollutants being monitored in our area (ground-level ozone, particle pollution (also known as particulate matter), carbon monoxide, sulfur dioxide, and nitrogen dioxide), ozone is of the greatest concern here.

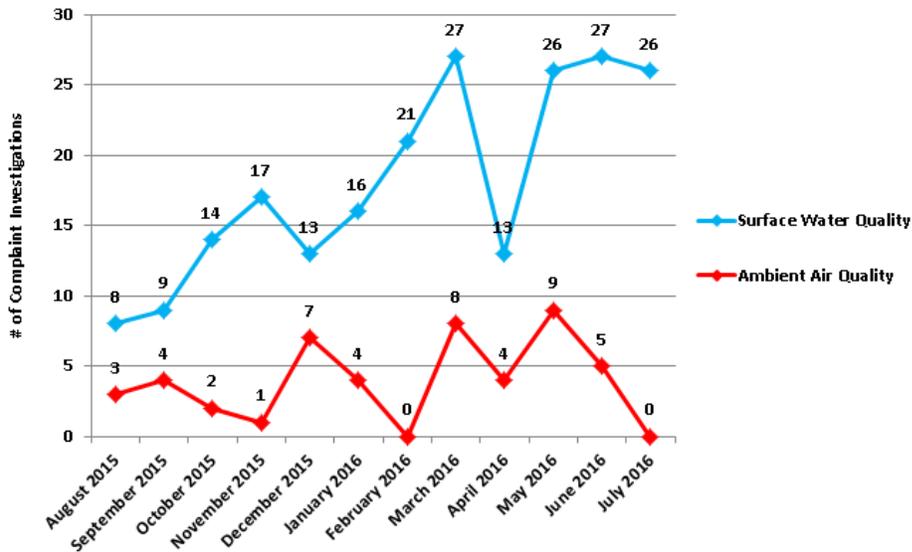

The higher the AQI value, the greater the level of air pollution and the greater the health concern. For example, an AQI value of 50 represents good air quality with little potential to affect public health, while an AQI value over 300 represents hazardous air quality. Although air pollutants like ozone are monitored every day, the “ozone season” in the Dallas-Fort Worth area runs March 1 through October 31, when conditions are most likely cause an air action alert day.

ENVIRONMENTAL MANAGEMENT

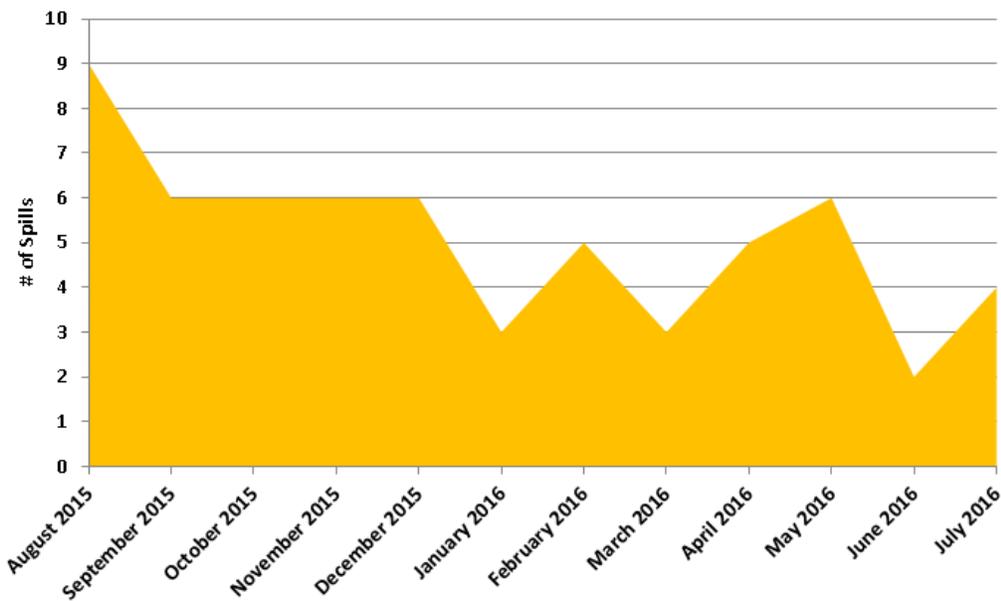

ENVIRONMENTAL COMPLAINTS INVESTIGATED

Environmental Management staff responds to citizen complaints concerning air and surface water quality issues. By way of example, these concerns can take the form of odors or excessive emissions from a business, sediment runoff from a construction site, or improper dumping of material down a storm drain. Pollution complaints can be reported online, through the Environmental Management web page - FortWorthTexas.gov/env/, or by calling the Environmental Hotline at 817-392-1234.

HAZARDOUS MATERIAL SPILL RESPONSE

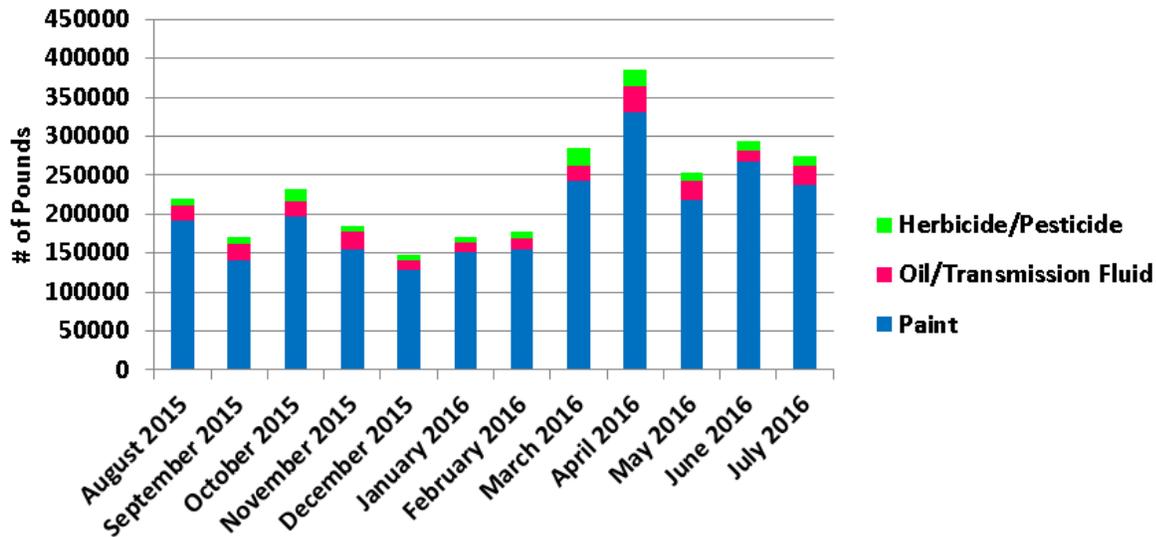

Environmental Management is tasked with responding to hazardous material spills on public roads 24 hours a day, 365 days a year. The primary objective in spill response is to ensure no hazardous material makes its way into storm drains or directly into the City's creeks, lakes, and river and if it does, take the necessary steps to correct the situation. The Division also makes sure that the responsible party absorbs the costs of any necessary clean up.

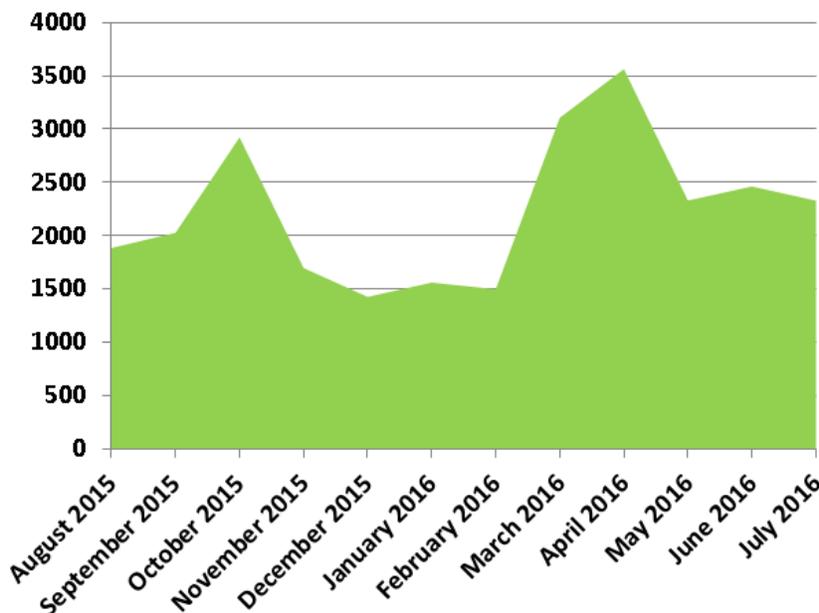

ENVIRONMENTAL COLLECTION CENTER

The Environmental Collection Center (ECC) provides the citizens of Fort Worth with a safe, free, and environmentally appropriate way of disposing of their household hazardous waste. These wastes include batteries, lightbulbs, cooking oil, automotive fluids, cleaning and lawn/garden chemicals, and paint. The ECC is open Thursday – Saturday in addition to mobile collections of the Crud Cruiser, which operate throughout the City from April to November. To support the costs of the program, Fort Worth has approximately 50 customer cities which pay a per household fee for their residents to use the ECC.

It is important to note that the ECC cannot accept waste from businesses and certain types of waste like ammunition, explosives, electronics, appliances, and medical waste.

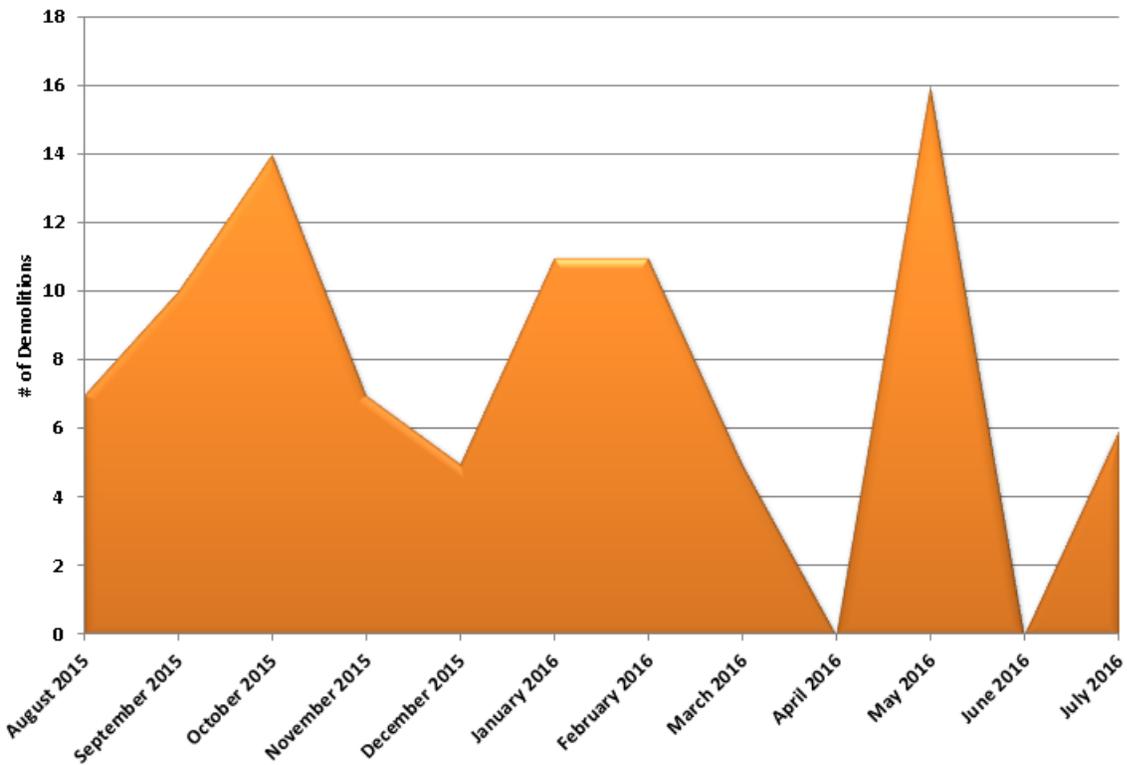

HOUSEHOLDS SERVED BY ECC

DEMOLITIONS

Substandard and unsafe buildings are a threat to public health and safety and reduce property values in a neighborhood. When buildings such as these come to the Division's attention – generally through citizen complaints, a lengthy investigation process begins to determine if repairs can be made or demolition of the building may be warranted. Should demolition be recommended, further legal processes ensure all appropriate rules are followed and the structure is torn down.

The Crud Cruiser, is a mobile collection vehicle which makes stops throughout our community operating from April to November.

Solid Waste Services

The Solid Waste Services Division manages the garbage, recycling and waste reduction services for the citizens of Fort Worth. All curbside collections are provided by contractors. More than 212,000 single family residences receive weekly garbage, yard waste and recycling collection. Bulk waste is collected monthly.

Fees are charged through the water billing system and assessed based on garbage cart size. We offer 32, 64 and 96 gallon carts; this is called a Pay as You Throw (PAYT) system and all solid waste services are included in the fee.

Commercial collection is open market, allowing businesses to choose their own contractor from permitted commercial solid waste haulers.

Primary Sections

Contract Compliance section duties include oversight of the following contracts:

- Curbside Collections – Waste Management
- Landfill Operations – Republic Services
- Recycle Processing – Waste Management
- Cart Purchases and Maintenance – Toter
- Roll-Off container transportation for Drop off Stations – Republic Services
- Bulk Disposal – Progressive Waste Solutions
- City Facilities Garbage and Recycling – Republic Services

Litter and Illegal Dumping Operations section is primarily responsible for the following:

- Responds to illegal dumping complaints; including abatement
- Collection of dead animals from residences and on city streets
- Responses to litter complaints; including abatement
- Code Enforcement activities related to illegal dumping and litter

Drop-off Station section is responsible for managing operations at the three existing Drop-Off Stations with a fourth under construction. There is no additional charge for Fort Worth residential solid waste customers to use the Drop-Off Stations. The Drop-off Stations accept excess garbage, brush, bulk items and recycling. Citizens can also drop-off tires, electronics and household items for recycling or re-use.

SOLID WASTE SERVICES

MISSED COLLECTIONS PER THOUSAND HOUSEHOLDS BY MONTH BY FISCAL YEAR

Missed collections reported by residents point out areas that may have repeat incidents and are tracked to provide awareness of contractor performance.

Periods of inclement weather can affect collections. Other factors affecting collections are excessive bulk and yard debris during spring and fall.

Waste Management is contracted to provide curbside collections in Fort Worth

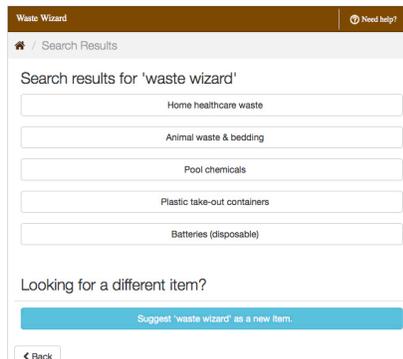

Knight Waste Services as a sub-contractor provides garbage and recycling collection to approximately 43% of the city

SOLID WASTE APPLICATIONS

The City offers a free android or iPhone application called the Fort Worth Garbage and Recycling App. This smartphone application enables residents to receive service notifications before their service days. The reminders include, for instance, bulk waste setout weeks and scheduled collection changes due to inclement weather. The App also provides residents with the ability to report service issues including missed collection or damaged carts, and to find out additional information about recycling. To learn more about the Fort Worth Garbage and Recycling App, please call 817-392-1234 or visit the App Store.

WASTE WIZARD

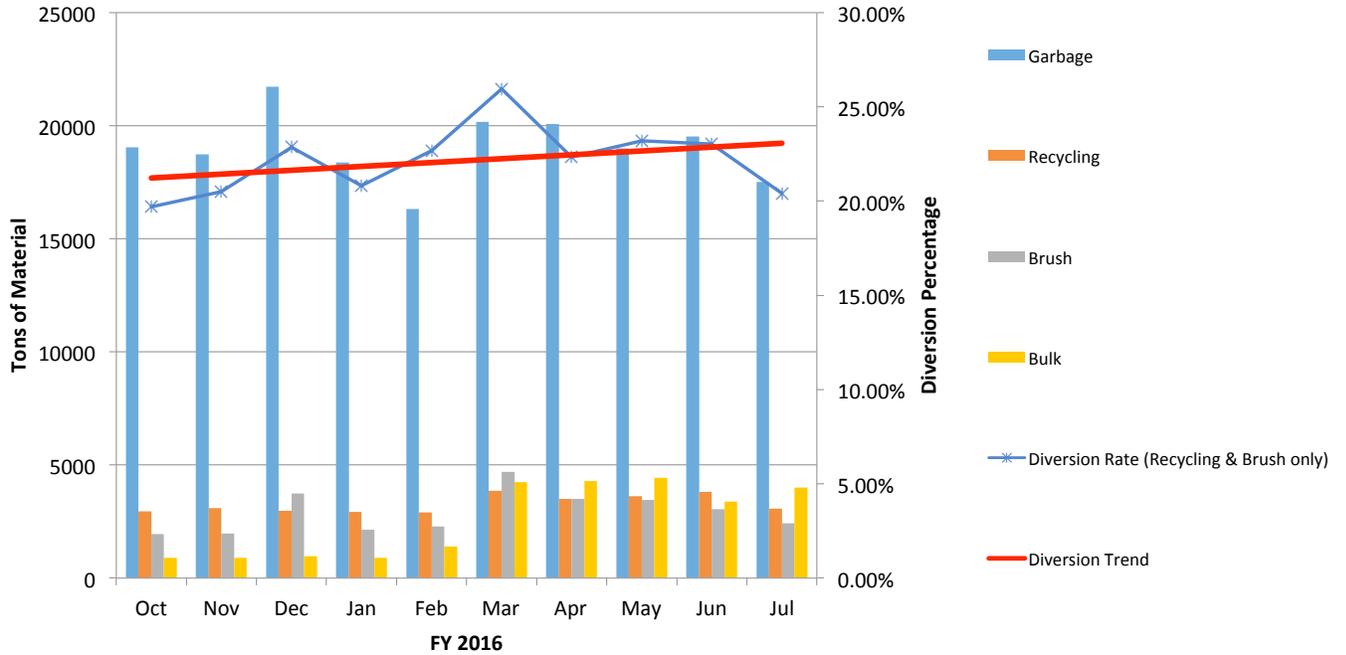

The city of Fort Worth has created an easy to use Waste Wizard to help customers learn what items go in the brown garbage cart, what can be recycled in the blue cart as well as electronics and household hazardous waste. The Waste Wizard is an online tool that provides information on how to properly handle and dispose of over 1500 different items.

Simply type the name of a waste item and the Waste Wizard will tell you how to recycle or dispose of it. Access the Waste Wizard by visiting www.FortWorthTexas.Gov/solidwaste/recycling or via the Fort Worth Garbage and Recycling app.

SOLID WASTE SERVICES

DIVERSION AND WASTE STREAM BY MONTH

Debris that is diverted from the landfill is a very good thing. Diverted debris includes items that have been recycled as well as yard waste. The more we, as a community, reduce, reuse and recycle the more we protect our natural resources, landfill space and energy.

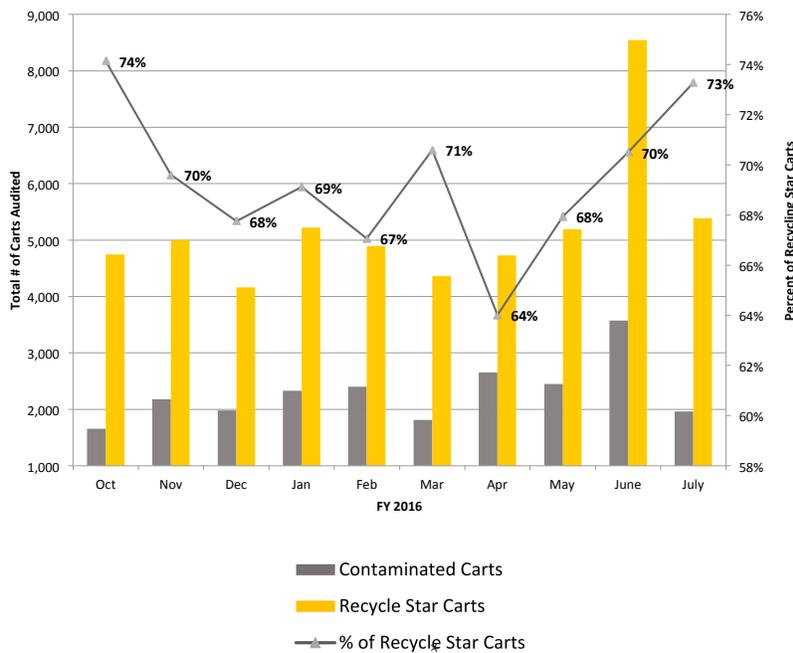

Recycling Cart Auditors “Blue Crew”

Recycling carts are evaluated by cart auditors known as the “Blue Crew”. They look in carts set out for collection and verify the debris in the cart is correct for our program. They notify residents who have items that are not allowed and educate them on what is acceptable so they can recycle properly in the future.

RECYCLE CART AUDIT RESULTS

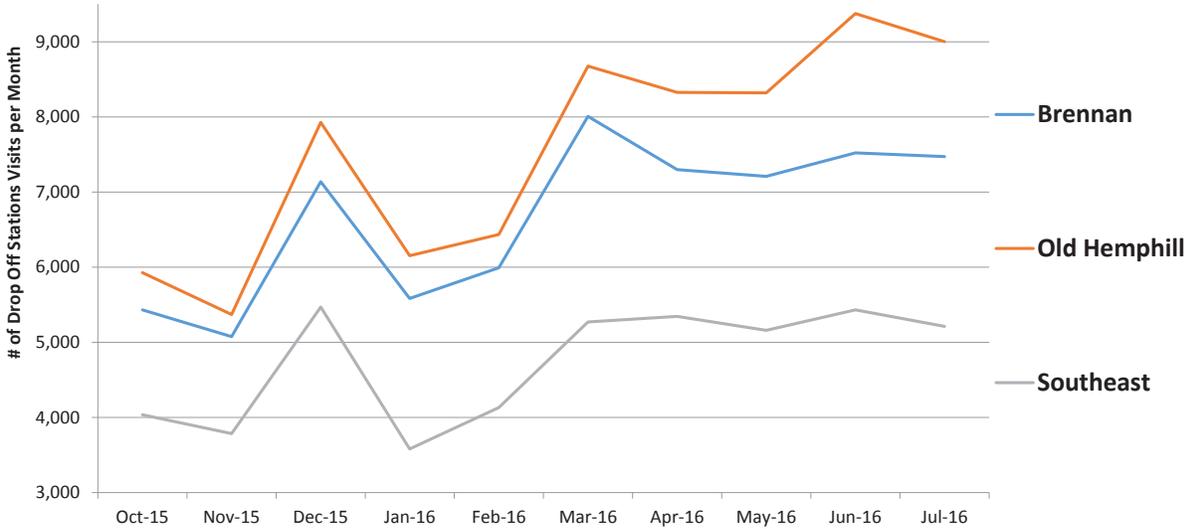

*Recycle Star households are those which were found to have no gross contamination in their recycle carts.

DROP OFF STATION VISITS

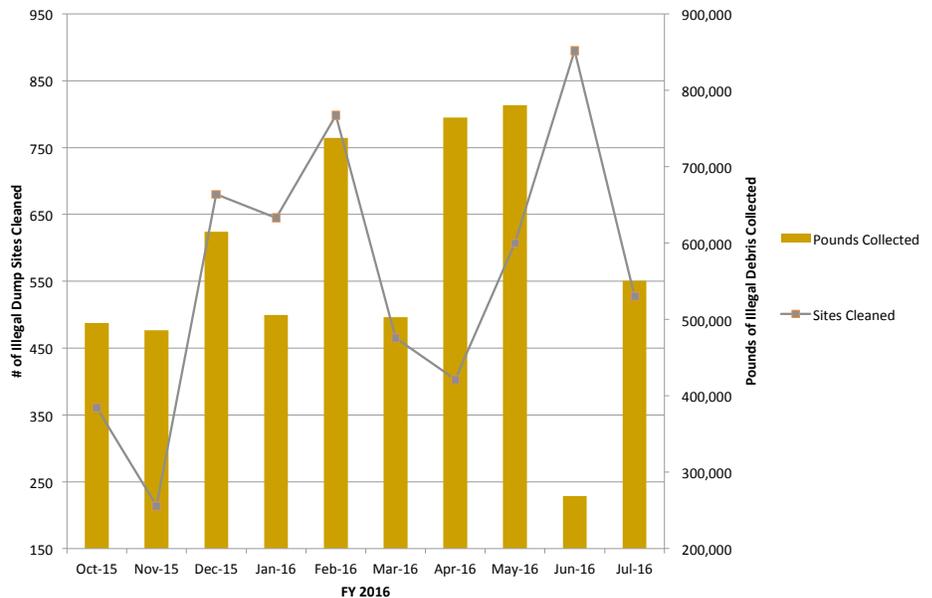

As a part of the monthly Solid Waste program, the city offers homeowners paying for residential services access to three existing and conveniently located Drop Off Stations, with a fourth location opening toward the end of the calendar year. The Drop Off Stations are established to allow residents to dispose of excess bulky materials (appliances, brush, broken furniture, tires, extra bagged garbage and other large items) between their monthly Bulk Waste Collections. In addition, the Drop Off Stations have reduced the number of illegal dump sites and pounds of material collected since opening to residents.

For more information: www.FortWorthTexas.Gov/solidwaste/dropoff

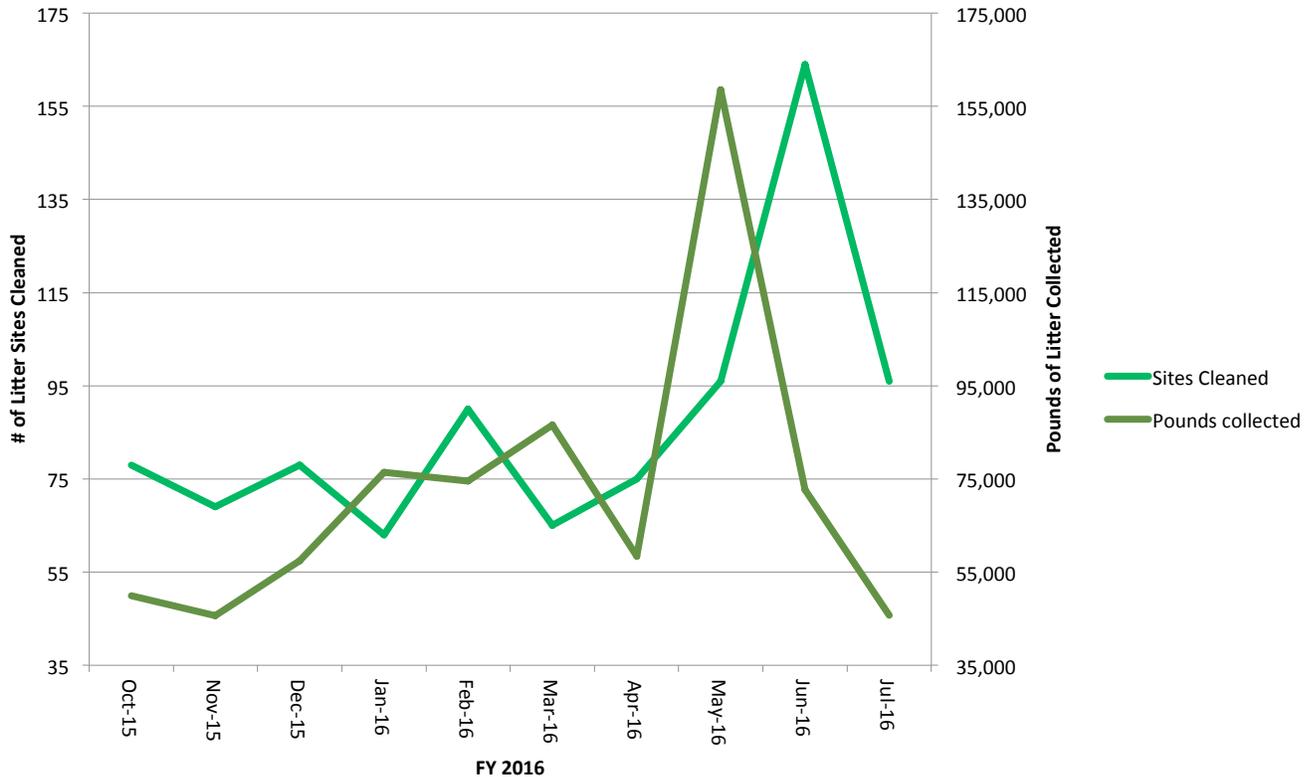

ILLEGAL DUMP CLEAN-UP

The Illegal Dump Crews have played an integral part of cleaning up reported dump sites in a timely manner, which reduces the negative impact on the surrounding community and prevents others from adding materials to the site. In addition, they also assist the Environmental Investigation Unit with identifying the criminals that generated the illegal dumping in the first place. Please do your part, and report any illegal dumping activities directly to the Police Department to assist with criminal enforcement.

LITTER CREW PICK UP SITES & DISPOSAL

The City's Litter Crews have continued to increase their response time and collection effectiveness with cleaning littered areas and beautifying the community. The emphasis towards litter prevention, individuals' collection and community engagement will improve our entire community – one piece and one person at a time. So the next time you go for a walk, take a small plastic bag to pick up the loose litter you encounter and demonstrate to others the first step is simply doing something about it yourself. In addition, you can lead with coordinating small neighborhood group clean-ups and show your support towards Keep Fort Worth Beautiful.

KEEP FORT WORTH BEAUTIFUL

FortWorthTexas.gov/kfwb/

DEBBIE BRANCH VALERIE FAMILO

Frequent hikes with her family helped Debbie Branch gain an appreciation for the outdoors and the environment at an early age. That only grew during her time as a Camp Fire Girl.

When her classmates were performing comedic skits or music during a talent show, 12-year-old Val Familo chose to perform about air pollution. It may have been years ago, but Familo is proving that her youthful performance was no act.

Their fondness for the taking care of the environment led Branch and Familo to the Solid Waste Services Division where, as professionals, they help to educate others about recycling, pollution and litter. Familo is responsible for overseeing and managing the numerous contracts for city's garbage and recycling collection. Branch is a planner for the department and oversees the programming and events of Keep Fort Worth Beautiful.

“We’re here because it’s our passion, Familo said. “Caring for our environmental and trying to live a more sustainable life is what we believe in - it’s just what we do.”

Familo and her co-workers are setting an example for their community right in their own backyards - and then some.

When a drought in 2011 claimed several of the trees that lined the street outside of their office building on Columbus Trail, Debbie Branch decided to replace them the next year. In 2013, they planted another batch for in honor of Earth Day. She borrowed the idea from her kids’ school.

“They planted trees and I thought it was awesome,” she said. “The forestry department gives them to people if you plant them between the street and the sidewalk, and you promise to care for them. I thought, ‘What a great legacy, to be kind of a Johnny Appleseed.’”

Carrying out that idea has been no small task though. With the trees extending all the way down the street, they couldn’t just break out the garden hose to water them. Taking care of the growing plants was quite a chore considering they needed to be watered every other day during a time when water was scarce.

So, they loaded up a wagon with five-gallon buckets and filled each with water from the pond behind their offices. They dragged the wagon down the street to get each tree. “That was a rough year, trying to keep them alive,” Branch said. “Everything was burnt up except the grass around the trees because we were watering them so much.” Though the trees have thrived, the watering job is never done.

Debbie, Val and a few other colleagues have also planted trees outside their office building to honor fellow workers’ whose children passed away. “We wanted to show them we were thinking about them,” Familo said.

In addition to honoring those lives, Familo and her peers added more life to the backyard of their building. They’ve even planted a vegetable garden on site. Although the corn hasn’t fared so well, tomatoes, cucumbers, okra, bell peppers and cantaloupe have been harvested from the area. Employees take what they want. In the fall, the plan to add a butterfly garden near the pond that is home to fish as well as turtles – turtles that Familo finds stranded on the roads.

A master compost class hosted at the office building led to a composting site out back. Employees bring their compostable items from home and add to it.

Their contribution to the environment extends beyond the grounds of the Solid Waste Services building. Debbie, Val and other colleagues use their lunch hour to pick-up trash and recyclable items in the surrounding neighborhoods.

“A lot of people yell ‘Thank you,’” Familo said. “It’s pretty cool.”

“Picking up bags of litter every day is miniscule in the grand scheme of it, but it matters to our street,” Branch said. “It just doesn’t make sense to trash our environment.”

The Code Compliance Department maintains Fort Worth's status as a clean, livable city by ensuring property complies with rules set by City Council. Code Officers routinely patrol assigned neighborhoods for code violations and investigate complaints with a mission of abating issues and educating residents.
