GENERAL SUMMARY

Provides information technology business analysis services to the City. Conducts business process analysis, needs assessments, enterprise analysis and preliminary costs/benefits analysis; works as liaison among stakeholders; and provides leadership for the department to support operations of client departments.

ESSENTIAL DUTIES & RESPONSIBILITIES

The intent of this job description is to provide a representative summary of the major duties and responsibilities performed by incumbents of this job. Incumbents may be requested to perform job-related tasks other than those specifically presented in this description.

1. Works with business process owners and various stakeholders to elicit, document, analyze, validate, and communicate requirements using established methods and tools for new and/or existing technology initiatives; evaluates information gathered from multiple sources; reconciles conflicts; decomposes high-level information into details; consolidates low-level information to a general understanding.

2. Communicates and collaborates with external and internal customers to analyze information needs and functional requirements and deliver business planner artifacts, as needed; coordinates and communicates with stakeholders, management staff and vendor staff on project issues and status.

3. Develops requirements specifications according to standard templates; works with Project Managers to document requirements and business process flows; and manages the requirements through the life of the project.

4. Performs vendor management; negotiates contracts and service level agreements; monitors and reports on vendor performance; and ensures compliance with purchasing policies and procedures.

5. Maintains awareness of new developments in the field of information technology; works with appropriate technical staff and others to incorporate/implement new developments as appropriate.

6. Conducts system analysis and design of business processes; participates in the evaluation of current and proposed information and business process flows and the costs/benefits of emerging technology; collaborates with developers and subject matter experts to establish the technical vision and analyze tradeoffs between usability and performance needs.
7. Oversees departmental and citywide projects; manages the goals, scope, budget, resources, communications, risks and schedules of the projects assigned; and trains and leads others involved.

8. Performs other related duties as required.

9. Adheres to assigned work schedule as outlined in the Department and City attendance policies and procedures; ensures all behaviors comply with the City’s Personnel Rules and Regulations.
