

Alternative Water Source Registration Form

City ordinance exempts irrigation performed using water sources other than the city's potable supply from the 10 a.m. to 6 p.m. prohibition on landscape irrigation. However, such alternative water sources must be registered with the city. In addition, these alternative sources are subject to verification and inspection. These systems must be in compliance with the federal, state and city requirements for cross connection control/backflow devices.

To register an alternative water source, complete this form and fax it to 817-871-8566. A separate form is required for each location. Please direct any questions to the Water department's Backflow/Cross Connection Control Section at 817-871-8375.
