6. Form on which the owner may explain the reasons why the nomination should be approved or denied.
What is permitted and not permitted on my property after a nomination is filed?

Stay of Actions After Nomination:

1. **Interim Controls.** The City Council finds that immediate, temporary controls are necessary to protect properties for which a notice of nomination for historic designation as a historic property has been mailed. Therefore, any property for which a notice of nomination as such has been mailed will be subject to the Certificate of Appropriateness (“COA”) requirements contained in this Historic Preservation Ordinance, effective beginning on the date that the HPO mails a notice of nomination and expiring 180 days thereafter or until the proposed historic designation is denied, whichever is sooner. In the event that the proposed historic designation is approved, the property will be subject to all COA requirements applicable to such historic designation. Permits issued by the city prior to the effective date of the interim controls will not be subject to interim controls or the COA requirements. Interim controls do not apply to historic designation removals.

2. **HSE/HC.** All permits for construction, repairs, alterations, additions, stabilization, restoration, rehabilitation, demolition, or relocation of any building, object or structure on the property shall be subject to the Certificate of Appropriateness requirements contained in Section 4.507 for a period of 135 days or until the proposed designation is denied whichever occurs first. If the proposed designation is approved, the property shall be subject to all Certificate of Appropriateness requirements applicable to such designation. Permits obtained for property before notices of nomination are mailed shall not be subject to interim controls or the Certificate of Appropriateness requirements.

3. **Demolition Delay.** After mailing notice of nomination, all permits for demolition or relocation of any building, object or structure on the property shall be subject to the Certificate of Appropriateness for a period of 135 days or until the proposed designation is denied, whichever occurs first. In the event that the proposed designation is approved, the property shall be subject to all Certificate of Appropriateness requirements applicable to Demolition Delay properties. Permits requested before the notice of nomination is mailed are not subject to the interim controls or the Certificate of Appropriateness requirements.

How does the process work?

**Step 1: Application guidelines**
Upon submission of the completed application, you will be placed on the next available scheduled Landmarks Commission meeting as a public hearing action item. Incomplete applications will not be accepted or forwarded to the Landmarks Commission for action. A completed application will consist of a description of the property, criteria for designation, and address and legal description for the property all this information is indicated on the following form.

**Step 2: Historic and Cultural Landmarks Commission Public Hearing**
The application shall be heard within 45 days after it is deemed complete, or as soon thereafter as is reasonably practicable. The HCLC may continue the case for a reasonable time if the Commission finds that all parties who have an interest in the structure or property are not present or that additional information is needed by the HCLC in order to evaluate such application. At the HCLC public hearing, the owner or owners, interested partied, local preservation groups and technical experts may present testimony or documentary evidence which will become part of a record regarding the historic, cultural, architectural or archeological importance of the structures or property.

**Step 3: Zoning Commission**
Upon recommendation of the HCLC, the proposed designation shall be submitted to the Zoning Commission. The Zoning Commission shall give notice and conduct its public hearing on the proposed designation within 45 days of the receipt of such recommendation from the HCLC, or as soon thereafter as is reasonably practicable.

Step 5: Design Guidelines
