

Downtown Fort Worth Water & Sewer Main Replacements

Fort Worth Water invites you to learn about a project to replace major cast iron water mains running through the western part of downtown. The project is in design with goal of going to bid for construction in September. Replacement of a sewer line in Summit Avenue is also part of the project.

Building managers and maintenance personnel are invited to learn more and confirm information related to water connections and fire lines.

A map of the project area is attached.

Thursday, June 27, 2024

10:30 a.m.

Old Fort Worth City Hall

200 Texas St.

Room 2020

For more details about the project, visit:
